TITLE 7—AGRICULTURE

Chapter XI—Production and Marketing Administration. (War Food Distribution Orders)

[WFO 16, Amdt. 6]

PART 1407—DRIED FRUIT

DRIED FRUIT, RAISINS, AND ZANTE CURRANTS
War Food Order No. 16, as amended
(8 F.R. 1705, 11019; 9 F.R. 4321, 4319,

9584, 10033; 10 F.R. 103, 126, 10419, 12076), is hereby further amended as follows:

1. By deleting the provisions of § 1407.1 (b) (1), (2), and (3) and inserting, in lieu thereof, the following:

(1) Except as permitted pursuant to (2), (3), or (9) hereof, no producer shall sell or deliver dried fruit, raisins, or Zante currants except to (i) the United States Department of Agriculture (including, but not limited to, any corporate agency thereof); (ii) any person or agency designated by the Assistant Administrator; or (iii) a packer.

(2) Except as permitted pursuant to (9) hereof, no person shall, unless specifically authorized by the Assistant Administrator, purchase, accept delivery of, or use any raisins or any Zante currants for conversion into alcohol, brandy, wine, any other beverage (whether alcoholic or not), any concentrate, any syrup, any paste, or any non-food product or non-food byproduct.

(3) Except as permitted pursuant to (9) hereof, no person shall sell any raisins or any Zante currants for conversion into alcohol, brandy, wine, any other beverage (whether alcoholic or not), any concentrate, any syrup, any paste, or any non-food product or non-food byproduct except to (i) the United States Department of Agriculture (including, but not limited to, any corporate agency thereof); or (ii) any person designated by the Assistant Administrator.

2. By adding, immediately following § 1407.1 (b) (8), the following:

(9) The provisions of (b) (1), (2), and (3) hereof shall not apply to rain damaged raisins and rain damaged Zante currants of the 1945 crops.

The provisions of this amendment shall be effective as of 12:01 a. m., e. s. t., October 17, 1945. With respect to violations, rights accrued, liabilities incurred, or appeals taken under the said War Food Order No. 16, as amended, prior to the effective time of this amendment, the provisions of the said War Food Order No. 16, as amended, in effect prior to the effective time of this amendment shall be deemed to continue in full force and

AUTHORITY: §§ 604.1 to 604.11, inclusive, issued under 39 Stat. 195, 41 Stat. 780, 44 Stat. 705; 10 U.S.C. 421, 423-427.

SOURCE: §§ 604.1 to 604.11, inclusive, contained in AR 150-5, 2 October 1945.

§ 604.1 *Enlistments*—(a) *Grade*. Enlistments in the Enlisted Reserve Corps will be in the seventh grade only, with the following exceptions:

(1) Except for those men currently enlisted in the National Guard and those separated from active service for physical disability, enlisted men of the Army of the United States who have served honorably and satisfactorily may, at the time of discharge, enlist in the Enlisted Reserve Corps in the grade in which serving at the time of discharge.

(2) Former enlisted men of the Army of the United States, other than those currently enlisted in the National Guard, who have served honorably and satisfactorily since September 16, 1940 and who were separated from active service prior to effective date of this part, may enlist in the Enlisted Reserve Corps in the grade in which serving at time of

discharge, provided they are found fully qualified physically and otherwise, and apply within 90 days of date of discharge from prior service or within 90 days of the effective date of this part.

(b) Individuals enlisted under subparagraphs (1) and (2) of this section will be permitted to retain ratings such as parachutists, combat infantrymen, and similar technical designations authorized by current War Department directives. Appropriate notation will be made on their records to reflect such action.

§ 604.2 *Eligibility*. (a) Except for those enlistments authorized under § 604.1 (a) (1) and (2), original enlistments in the Enlisted Reserve Corps will be made only from men who have attained their seventeenth birthday but who have not attained their eighteenth birthday, provided written consent of parents or guardian is obtained.

(b) *Service for which enlisted*. (1) Men who have attained their seventeenth birthday but who have not attained their eighteenth birthday will be enlisted in the Enlisted Reserve Corps, unassigned.

(2) Men separated from active service in the Army of the United States or who have served in the Army of the United States since September 16, 1940 may select any arm or service listed below in which they have served:

- (i) Administrative Enlisted Reserve.
- (ii) Adjutant General's Department Enlisted Reserve.
- (iii) Air Corps Enlisted Reserve.
- (iv) Armor Enlisted Reserve (including tank destroyer personnel).
- (v) Cavalry Enlisted Reserve.
- (vi) Chemical Warfare Enlisted Reserve.
- (vii) Coast Artillery Corps Enlisted Reserve.
- (viii) Corps of Engineers Enlisted Reserve.
- (ix) Corps of Military Police Enlisted Reserve.
- (x) Field Artillery Enlisted Reserve.
- (xi) Finance Department Enlisted Reserve.
- (xii) Infantry Enlisted Reserve.
- (xiii) Medical Department Enlisted Reserve.
- (xiv) Military Intelligence Enlisted Reserve.
- (xv) Ordnance Department Enlisted Reserve.
- (xvi) Quartermaster Corps Enlisted Reserve.
- (xvii) Signal Corps Enlisted Reserve.
- (xviii) Transportation Corps Enlisted Reserve.

(c) No individual will be placed in the Enlisted Reserve Corps who is over 38 years of age.

(d) The placement of female members of the Army in the Enlisted Reserve Corps is prohibited.

§ 604.3 *Qualification*. All men enlisted in the Enlisted Reserve Corps must be citizens of the United States and must be qualified for military service in accordance with current standards for induction.

§ 604.4 *Physical examination*. (a) The standards for physical examination

will be those prescribed in MR 1-9, Standards of Physical Examination During Mobilization, except, however, the War Department may prescribe special standards for physical examination for enlistments in certain branches of the service or for special types of duty.

(b) When necessary, applicants who are otherwise qualified for enlistment in the Enlisted Reserve Corps or Air Corps Enlisted Reserve may be transported from the recruiting station or examining board to the nearest station where a physical examination may be given, retained thereat, furnished meals and lodging, and returned at Government expense. Cost of transportation, meals, and lodging, when not furnished in kind by the Government, should be charged to the applicable open allotment number under the appropriation "Finance Service, Army" for permanent change of station travel.

(c) Physical examination given upon separation from active service will form the basis for determinations of physical fitness for those enlisted under § 604.1 (a) (1), and such individuals may be enlisted if physically qualified for general service or limited assignment. Those enlisted under § 604.1 (a) (2) or § 604.2 (a) will be given a physical examination.

§ 604.5 *Call or recall to active duty*—(a) *Authority*. Men enlisted under the authority contained in § 604.2 (b) (1) will not be ordered to active service until they have attained their eighteenth birthday but may be ordered to active service immediately thereafter, except that:

(1) Students in attendance at colleges or secondary schools may, upon their own application, be deferred from call to active duty to complete the term or semester in which they reach their eighteenth birthday, but in no case beyond the age of 18 years and 6 months.

(2) Members of the Enlisted Reserve Corps who are enrolled in the Army Specialized Training Reserve Program will be called to active duty at the end of the term in which they reach their eighteenth birthday.

(3) Members of the Air Corps Enlisted Reserve, including those enrolled in the Army Specialized Training Reserve Program, will be called to active duty upon receipt of quotas furnished by The Adjutant General but in no case later than the age of 18 years and 6 months.

(4) Commanding generals of service commands are authorized to defer the call to active duty for illness or other cogent reasons but in no case shall the deferment be extended beyond the age of 18 years and 6 months.

(b) Men enlisted under the provisions of paragraph (a) of § 604.1 will not be called to active duty except as ordered by the Secretary of War.

§ 604.6 *Voluntary requests for call to active duty*. (a) Men enlisted under the provisions of paragraph (a) of § 604.1 may voluntarily request call to active duty, or be discharged from the Enlisted Reserve Corps to enlist in the Regular Army upon submission in writing of their formal request to the commanding general of the service command of residence.

(b) Members of the Enlisted Reserve Corps, unassigned, enlisted under the provisions of § 604.2 may, upon attaining their eighteenth birthday, if not ordered to active duty immediately, voluntarily request call to active duty or be discharged from the Enlisted Reserve Corps to enlist in the Regular Army upon submission in writing of their formal request to the commanding general of the service command of residence.

§ 604.7 *Grade.* Men accepted for active duty will be called in grade held at time of relief from active duty.

§ 604.8 *Transfer to Enlisted Reserve Corps; authority.* No individual will be inducted or enlisted and immediately transferred to the Enlisted Reserve Corps or released from active service and transferred to the Enlisted Reserve Corps except under the provisions of Army Regulations.

§ 604.9 *Separation from service—(a) Discharge from active duty.* When on active duty the discharge of members of the Enlisted Reserve Corps will be governed by the provisions of Army Regulations.

(b) *Discharge from inactive status.* Individuals on an inactive status in the Enlisted Reserve Corps will be discharged in accordance with the provisions of Army Regulations.

§ 604.10 *Identification card.* (a) WD AGO Form 166 (Identification Card—Enlisted Reserve Corps) will be prepared and given to the enlisted man at the time of his enlistment or transfer to the Enlisted Reserve Corps to be retained in his possession until called to active duty or discharged.

(b) The reverse side of the identification card contains instructions to the reservist regarding report of change of address.

§ 604.11 *Change of residence.* Immediately upon making a change of residence a member of the Enlisted Reserve Corps will notify the commanding general of the service command of the fact, stating his new place of residence and address. If the new residence is within another service command, the commanding general of the service command in which the reservist's old residence is located will forward his enlistment record and other personnel papers to the commanding general having jurisdiction over his new residence.

TITLE 30—MINERAL RESOURCES

Chapter VI—Solid Fuels Administration for War

PART 602—GENERAL ORDERS AND DIRECTIVES

DIRECTION TO ALL PERSONS SHIPPING BITUMINOUS COAL PRODUCED IN DISTRICTS 1-4, AND 6-8, INCLUSIVE, AND TO CERTAIN DOCK OPERATORS

It is necessary, pursuant to SFAW Regulation No. 1, as amended, to issue the following direction:

1. The general emergency directions listed below are hereby revoked:

Notice of Direction to Persons Shipping Coal Produced in Districts Nos. 2, 3, 6 and 8, prohibiting export movement, issued October 2, 1945 (10 F.R. 12481).

Notice of Direction to Coal Producers in Districts Nos. 2, 3, 6 and 8, prohibiting shipments except to certain classes of persons referred to in Statement Concerning Direction Sent to Certain Producers in Districts Nos. 2, 3, 6 and 8, issued October 2, 1945 (10 F.R. 12481).

Notice of Direction to Certain Producers in District No. 4, prohibiting shipments except to certain classes of persons referred to in Statement Concerning Direction Sent to Certain Producers in District No. 4, issued October 3, 1945 (10 F.R. 12549).

Notice of Direction to Persons Shipping Coal Produced in District No. 7, prohibiting export movement, issued October 3, 1945 (10 F.R. 12550).

Notice of Direction to Coal Producers in District No. 7, prohibiting shipments except to certain classes of persons referred to in Statement Concerning Direction Sent to Certain Producers in District No. 7, issued October 3, 1945 (10 F.R. 12550).

Notice of Direction to Persons Shipping Coal Produced in District No. 1, prohibiting

export movement, issued October 4, 1945 (10 F.R. 12627).

Notice of Direction to Coal Producers in District No. 1, prohibiting shipments except to certain classes of persons referred to in Statement Concerning Direction Sent to Certain Producers in District No. 1, issued October 4, 1945 (10 F.R. 12627).

Notice of Direction to Commercial Dock Operators on the Great Lakes, Tidewater and River, prohibiting shipments except to certain classes of persons referred to in Statement Concerning Direction Sent to Commercial Dock Operators on the Great Lakes, Tidewater and River, issued October 5, 1945 (10 F.R. 12627).

2. Effective immediately, and until further notice, all persons shipping bituminous coal produced in Districts 1-4, inclusive and 6-8, inclusive, and all commercial dock operators except commercial dock operators located on the Great Lakes, are prohibited from shipping during any calendar month, any bituminous coal to any industrial consumer whose days' supply of coal, as of the last day of the preceding month, was 45 days or more, as shown by information in the order, or confirmation of the order, furnished pursuant to § 602.712 of SFAW Regulation No. 27, for recording by the producer on Form SFA No. 79. In the absence of such data, the shipper may use other reliable evidence of an industrial consumer's days' supply.

3. The provisions of this Notice of Direction do not relieve shippers and industrial consumers from complying with the provisions of SFAW Regulation No. 27, as amended, and with the provisions of all other outstanding directions including those contained herein.

4. The provisions of this Notice of Direction do not relieve shippers of coal from complying with the provisions of the Notice of Direction to Shippers of Coal Produced in Districts Nos. 2, 7 or 8 Moving Via the Great Lakes, issued September 14, 1945 (10 F.R. 11894) and Notice of Direction to Shippers of Coal Produced in Districts 1, 3, 4 or 6 Moving Via the Great Lakes, issued October 15, 1945 (10 F.R. 12898). As indicated in the Statement Concerning Necessity of Continuing in Effect SFAW Regulation No. 27, issued October 2, 1945 (10 F.R. 12481), the brevity of the remaining period of lake navigation makes it imperative that obligations of shippers to furnish coal moving via the Great Lakes be met with the utmost dispatch.

5. This Notice of Direction does not affect civil or criminal liabilities resulting from violations of any directions revoked herein.

This direction shall become effective immediately.

PART 1300—PROCEDURE

[Procedural Reg. 16, Amdt. 1]

APPLICATIONS FOR SPECIAL SUBSIDY PAYABLE TO SLAUGHTERERS

Procedural Regulation No. 16 is amended in the following respects:

1. Section 1300.712 (a) is amended to read as follows:

(a) (1) The application shall be in writing and shall consist of an original and four copies. The application shall be signed and verified either by the slaughterer personally or if a partnership, by a partner, or if a corporation or association, by a duly authorized officer thereof.

(2) The application shall be filed with the Secretary of the Office of Price Administration, Washington 25, D. C.

(3) Any application may be filed at any time up to 30 days following the close of the applicant's fiscal year or within 30 days following the date of termination of the right to receive subsidy payments pursuant to the provisions of § 1300.715.

2. That part of § 1300.712 (b) preceding subparagraph (1) is amended to read as follows:

(b) Each application filed pursuant to this regulation shall contain the following information with respect to the slaughterer's business:

This amendment shall become effective October 18, 1945.

NOTE: The reporting provisions of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 18th day of October 1945.

PART 1305—ADMINISTRATION

[ISO 108, Amdt. 6]

MANUFACTURERS' MAXIMUM AVERAGE PRICES
FOR CERTAIN ITEMS OF APPAREL AND
APPAREL ACCESSORIES

A statement of the considerations involved in the issuance of this supplementary order, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Supplementary Order 108 is amended in the following respects:

1. Section 6 is amended to read as follows:

SEC. 6. Surcharges and credits—(a) What is a surcharge. A surcharge is the amount by which your weighted average price in a category for any quarter exceeded your maximum average price for that category, multiplied by the number of units you delivered in the category.

(b) What is a credit. A credit is the amount by which your maximum average price in any category in any calendar quarter exceeded your weighted average price for that category, multiplied by the number of units you delivered in the category.

(c) How to find your net surcharge or your net credit. You must find your net surcharge or your net credit at the end of each quarter as follows:

Step 1. Find the dollar amount of your surcharge in each category in which you incurred a surcharge (according to paragraph (a)).

Step 2. Add together the dollar amounts of all surcharges you have found.

Step 3. Find the dollar amount of your credit in each category in which you earned a credit (according to paragraph (b)).

Step 4. Add together the dollar amounts of all credits you have found and add to this figure the dollar amount of net credit from the previous quarter, if any.

Step 5. Subtract the smaller total from the larger total. If the total surcharge is larger than the total credit you have a net surcharge. If the total credit is larger than the total surcharge you have a net credit.

(d) Effect of net surcharge or net credit—(1) Net surcharge. If you incurred a net surcharge in any quarter you must begin to operate on a makeup basis on the first day of the quarter immediately following the quarter in which you incurred the net surcharge.

(2) Net credit. If you have a net credit at the end of any quarter, you use that net credit at the end of the next quarter in following the instruction in step 4 in paragraph (c) above.

NOTE: The "weighted average price" referred to in this section and in section 5 is your weighted average price for items delivered when you were not operating on a makeup basis as described in section 7.

2. Section 7 is amended to read as follows:

SEC. 7. Makeup operation. If you have incurred a net surcharge in any calendar quarter you must start to operate on a makeup basis at the beginning of the next quarter. After the thirtieth day of that quarter and until you have made up your net surcharge, you may not deliver pursuant to an offer or a sale any item in

any category (including categories in which you have not incurred a surcharge), at a net price higher than your maximum average price for that category at the time of delivery. In other words, your maximum average price is the highest net ceiling price you may establish during a makeup period after the thirtieth day.

However, during the fourth quarter of 1945 the limitation in this paragraph shall apply after November 30, 1945, instead of after the thirtieth day of the quarter.

Your net surcharge is made up when the weighted average prices of your deliveries in all categories are sufficiently below the maximum average prices for those categories at the time of delivery so that the differences between the two, when multiplied by the number of units delivered in each category during the makeup period, are equal to the amount of your net surcharge. You may make up your net surcharge by delivering items at prices below your maximum average prices in any categories whether or not you incurred a surcharge in those categories.

Once you have made up your net surcharge, you may cease to operate on a makeup basis. Deliveries made during a period of makeup operation may not be included in the computation of your weighted average price for the remainder of any calendar quarter during which you have made up a surcharge. However, all deliveries made during the remainder of any quarter after you have made up a surcharge are included in the computation of your weighted average price for that quarter.

An explanation of the record keeping and reporting requirements during a makeup period is given in section 12 of this order, together with suggested forms for keeping these records and preparing these reports.

3. Section 12 is amended to read as follows:

SEC. 12. Records and reports—(a) Records. You must keep the records required by this order available for examination by the OPA for so long as the Emergency Price Control Act of 1942, as amended, remains in effect. The records required by this order, including invoices, must be kept in your main office from which your billings are made.

(1) Original records. You must keep all the original records, including invoices and other data used by you in preparing your maximum average price chart.

(2) Invoices. You must keep a copy of each invoice you give in connection with your deliveries of items covered by this order.

(3) Charts, reports and orders. You must keep copies of your maximum average price chart, all reports you file with the OPA under this order and all individual orders affecting you issued by the OPA under Supplementary Order 108.

(4) Makeup operation record. If you are operating on a makeup basis, you must keep a daily or weekly cumulative record, by category, of the total net dollar amount charged for items delivered, the total number of units delivered and

the amount of surcharge made up. This record must be kept separately for each quarter during which you operate on a makeup basis.

To find your cumulative net dollar amount charged, you add each day's or week's net charges in a category to the total of all the preceding net charges in that category since the beginning of the quarter. To find your cumulative number of units delivered, you add the number of units delivered each day or week to the total of all the units previously delivered since the beginning of the quarter. To find the cumulative amount of surcharge made up you multiply the cumulative number of units delivered by your maximum average price and subtract from the result your cumulative net dollar amount charged.

If you delivered items in more than one category, you then add the individual amounts of surcharge made up in each category. If your cumulative net dollar amount charged in any category is more than your cumulative number of units delivered multiplied by your maximum average price, you find the difference between the two and subtract this difference from the cumulative amount of surcharge made up in all other categories. The result is your cumulative amount of net surcharge made up. You must keep a daily or weekly record of the cumulative amount of net surcharge which has been made up each day or week.

At the end of a makeup operation (that is, when the net surcharge has been made up), you draw a line across your delivery record separating your makeup operation from your subsequent operation and note the date on the line. Of course, the end date of your makeup operation will be the same for all categories you deliver because as soon as you have made up your net surcharge you may resume your usual range of deliveries in all categories.

(5) Optional records. (i) It is not required but it is suggested that you keep at all times, to assist you in complying with this order, a daily cumulative record, by category, of the net dollar amount charged for items delivered and the number of units delivered, as described in (4) above. It is also suggested that you keep a record of your cumulative weighted average price.

To find your daily cumulative weighted average price in any category you divide the cumulative net dollar amount charged by the cumulative number of units delivered in that category. In this way, you can see from day to day whether your weighted average price for each category is higher or lower than your maximum average price. If you do not keep this daily cumulative record, it is suggested that two or three weeks before the end of each quarter you determine your weighted average price up to that time so that you may know how to arrange your deliveries during the balance of the quarter to avoid incurring a surcharge at the end of the quarter.

(ii) As an alternative, you may keep a simple record, by category, of your deliveries of items covered by this order. For each day's or week's, or month's

deliveries you would show separately for each category: (a) the period covered (day, week or month), (b) the total net dollar amount charged for items delivered in that period, and (c) the total number of units delivered in that period.

(6) *Suggested forms for keeping the records described in subparagraphs (4) and (5).* These forms may be duplicated but will not be furnished by the OPA.

OPA DELIVERY RECORD UNDER SECTION 12 (a) (5), (II) OF SO 108, CATEGORY A-10, WOMEN'S, MISSES', AND JUNIORS' WOOL JACKETS

June 1 through September 30, 1945.
Maximum average price, \$5.45.

(1) Date	(2) Total net dollar amount charged for items delivered on date specified	(3) Total number of units delivered on date specified
6/7	\$760	120
6/8	300	60
6/11	400	84
9/28	500	100

Summary for the quarter:

Total net dollar amount charged	\$21,370
Total number of units delivered	3,475
Weighted average price (\$21,370 ÷ 3,475)	\$6.15
Dollar amount of surcharge (\$6.15 minus \$5.45 equals \$.70) (\$.70 x 3,475 equals \$2,432.50)	\$2,432.50

¹ Total column 2 for the quarter.

² Total column 3 for the quarter.

This sample form shows, for one category only, a way for you to arrange a daily delivery record in accordance with subparagraph (5) (ii) of this section. The filled-in figures show how the necessary computations would be made for the first quarter of operation under this order (that is, the third calendar quarter of 1945) by a manufacturer who delivered only one category, Category A-10, and who incurred a surcharge in that category. The figures shown under the heading "Summary for the Quarter," need not be shown in your delivery or makeup operation records but serve to illustrate the outcome of this manufacturer's operations.

The record for the third quarter of 1945 shows that this manufacturer exceeded his maximum average price for the period of the year in which the third quarter falls. Therefore, he must figure the dollar amount of surcharge which he incurred in Category A-10 and that amount is his net surcharge for the third quarter. If he had delivered more than one category in that quarter, he would have added the dollar amounts of surcharge in all his categories and then subtracted the dollar amounts of all his credits to find the dollar amount of his net surcharge for the quarter.

From the beginning of the fourth calendar quarter this manufacturer must operate on a makeup basis until he makes up his net surcharge incurred in the third quarter. The sample form below shows how he can arrange his rec-

ords which he is keeping daily, and make the necessary computations for that part of the fourth quarter of 1945 during which he is on a makeup basis. The form further illustrates how he can keep his records after he has made up his net surcharge if he chooses to use the suggested cumulative delivery record described in subparagraph (5) instead of the simple record of daily deliveries.

OPA MAKE-UP OPERATION AND DELIVERY RECORDS UNDER SECTION 12 (A) (4) AND (5) (I) OF S O 108

Category A-10, women's, misses' and juniors' wool jackets.

10/17	645.00	100	
10/19	1,735.00	300	
10/20	3,910.00	600	
10/23	4,700.00	800	
12/31	22,572.00	4,400	

Summary for the quarter (excluding deliveries made while on makeup basis):

Total net dollar amount charged	\$22,572.00
Total number of units delivered	4,400
Weighted average price	\$5.13
Dollar amount of credit (\$5.45 - 5.13 = \$0.32; \$0.32 × 4400 = \$1,408.00)	\$1,408.00

The record of this manufacturer for the fourth quarter of 1945 shows how the cumulative dollar amount of surcharge made up (column 4) can be computed directly at any time by using the cumulative figures entered in columns 2 and 3. By October 17 his deliveries were such that the cumulative dollar amount of surcharge made up was equal to the net surcharge and, therefore, that date is shown on a line drawn across his record to indicate the end of his makeup operation. His record shows that he made additional deliveries on that date which he recorded separately in his record for the remainder of the quarter when he was no longer on a makeup basis.

Since the entries in columns 2 and 3 of the form shown above are cumulative, the entries for the last day's deliveries in the quarter are automatically the final figures for the manufacturer's entire operation in Category A-10 for that quarter. For all deliveries he made during the remainder of that quarter, after he ceased operating on a makeup basis, his record shows that his weighted average price was less than his maximum average price, that is, he had earned a credit in Category A-10 which, because he de-

livered only that category, became a net credit. He will be able to use this credit in computing his net surcharge or net credit at the end of the next quarter.

As explained in subparagraph (5) of this section, he can determine his cumulative weighted average price at any time during the quarter by dividing the cumulative net dollar amount charged (column 2) by the cumulative number of units delivered (column 3).

(b) *Reports*—(1) *Quarterly reports.* Within 20 days after the end of each calendar quarter, you must file with your OPA District Office two copies of a report (signed by an owner, officer or principal) covering all categories which you delivered during the quarter. This report shall contain the following:

(i) Your business name and address;
(ii) Calendar quarter covered by the report;

(iii) Category number and title of each category delivered during the quarter;

(iv) Maximum average price for each category listed in (iii);

(v) Total net dollar amount charged for deliveries during the quarter for each category;

(vi) Total number of units delivered in each category;

(vii) Weighted average price for each category;

(viii) Dollar amount of credit or surcharge, if any, for each category;

(ix) Dollar amount of surcharge for all categories combined, if any;

(x) Dollar amount of credit for all categories combined, if any;

(xi) Dollar amount of net credit, if any, from previous quarter;

(xii) Net surcharge (ix minus the sum of x and xi) or net credit (the sum of x and xi minus ix), if any.

Deliveries made while operating on a makeup basis shall not be included in the above report.

(2) *Makeup reports.* If you have been operating on a makeup basis, you must file with your OPA District Office two copies of a report (signed by an owner, officer or principal) covering your makeup operation within 10 days after you complete your makeup operation. If you do not make up your net surcharge during the calendar quarter after the quarter in which it was incurred you must file this report instead of the quarterly report for that quarter, and for each succeeding quarter in which you operate wholly on a makeup basis. In addition, you must file a final report of that portion of your makeup operation not previously reported within 10 days after the day on which you completely make up your net surcharge. Each makeup report must contain the following information:

(i) Your business name and address;

(ii) The beginning and end dates of the period covered by the report;

(iii) Your net surcharge at the beginning of the period (net surcharge incurred less any amount previously made up and reported);

(iv) For each category you delivered during the period:

(a) Category number and title;

(b) Maximum average price for the period;

(c) Total net dollar amount charged during the period;

(d) Total number of units delivered;

(e) Dollar amount of surcharge made up;

(v) Dollar amount of net surcharge you made up in all categories combined during the period.

(3) Examples of reports under paragraph (b) (1) and (2). These reporting forms may be duplicated but will not be furnished by the OPA.

Signed: ABC MANUFACTURING Co.,
By: GEORGE BLACK,
Title: President.

The three sample reports, above, show how you may arrange your own quarterly and makeup reports. The first report shown is for the first quarter of operation and therefore would be filed within 20 days after end of the quarter specified in the report. This report shows that in Category A-10 the reporting company's weighted average price was more than its maximum average price for the period and therefore a surcharge had to be computed and reported. In Category A-26 the company earned a credit because its weighted average price was less than its

maximum average price for that category in that period. In Category A-18 the weighted average price equaled the maximum average price. Therefore, the credit earned was subtracted from the surcharge, leaving a net surcharge to be made up of \$900.

The second and third sample reports show that the reporting company made up its net surcharge during the fourth calendar quarter of 1945, that is, the quarter following the one in which it was incurred; therefore, the second report would be filed within 10 days after the

company completed its makeup and the third report shown would be filed within 20 days after the end of the fourth quarter. The dates specified in the makeup report indicate that the company made up the net surcharge incurred in the previous quarter by October 25, at which time it ceased to operate on a makeup basis. The figures shown in the makeup report indicate that the company made up a portion of the net surcharge in each of the categories delivered during the makeup period. The quarterly report covering the remainder of the fourth quarter when the company was not on a makeup basis shows that a credit was reported for Category A-26 in that quarter and no surcharges were incurred. Therefore the company had a net credit for that quarter.

This amendment shall become effective October 22, 1945.

NOTE: All record keeping and reporting requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 17th day of October 1945.

PART 1305—ADMINISTRATION

[SO 137]

ADJUSTMENT OF MANUFACTURERS' PRICES FOR CERTAIN KNITTED GARMENTS

A statement of the considerations involved in the issuance of this supplementary order, issued simultaneously here-

with, has been filed with the Division of the Federal Register.

AUTHORITY: § 1305.165 issued under 56 Stat. 23, 765; 57 Stat. 566; Pub. Law 383, 78th Cong.; Pub. Law 108, 79th Cong.; E.O. 9250, 7 F.R. 7871; E.O. 9328, 8 F.R. 4681; E.O. 9599, 10 F.R. 10155.

SECTION 1. What this order does. This supplementary order provides a procedure whereby manufacturers of garments belonging to any of the categories listed in Appendix A may apply for adjustment of their present ceiling prices on such garments. Pending OPA authorization of adjusted manufacturers' ceiling prices for these garments, the order permits manufacturers and wholesalers to sell and deliver them on an adjustable pricing basis. Thus, for garments in the categories listed in Appendix A, this order supplements the regulations establishing manufacturers' ceilings, and those establishing wholesalers' ceilings.

SEC. 2. Adjustment of manufacturers' ceilings—(a) Who may apply. A manufacturer of any garment belonging to any of the categories listed in Appendix A, whose "present ceiling price" for the garment is less than the garment's "current total unit cost" plus 4% of such cost, may apply for an adjustment of his "present ceiling price."

"Present ceiling price" is the ceiling price established for the garment under Maximum Price Regulation 221 (Manufacturers' Prices for Fall and Winter Knitted Underwear), or the General Maximum Price Regulation (whichever is applicable), exclusive of any adjustment permitted under Revised Supplementary Order 99 (Adjustment of Maximum Prices for Specified Knitted Underwear Garments Manufactured pursuant to Direction of War Production Board).

Instructions for calculating "current total unit cost" are provided with the form required to be filed under paragraph (c) (2) below. However, OPA will not, under this order, give consideration to any costs attributable to the following:

- (1) To seasonal, non-recurring or temporary factors affecting the applicant's operations; or
- (2) To a reduction in volume of production below the normal economical capacity of the applicant's plant; or
- (3) To the payment of unlawful wages or excessive salaries, or of unlawful or excessive prices for materials; or
- (4) To the payment of voluntary wage increases instituted pursuant to section 1 of Title IV of Executive Order 9599 (August 18, 1945); or
- (5) To the incurring of factory overhead costs or of selling, administrative and general costs which are abnormally high relative to sales or other costs, unless such excess is demonstrated by clear and convincing evidence to have been unavoidable in the exercise of sound business judgment and management.

(b) **Amount of adjustment.** A manufacturer's present ceiling for any garment described in paragraph (a) above will be adjusted to equal the current total unit cost of the garment plus 4% of such cost. However, this adjustment

shall only apply to deliveries of the garment made by the manufacturer on and after October 17, 1945, but prior to February 1, 1946.

(c) **Filing of applications.** Applications must be filed by registered mail with the Consumer Goods Price Division, Office of Price Administration, Washington 25, D. C., in accordance with Article III of Revised Procedural Regulation No. 1, and must contain, unless the information is already on file with the Office of Price Administration, Washington, D. C.:

(1) Balance sheets and profit and loss statements for the years (fiscal or calendar) 1936 to 1939, inclusive, the most recent calendar or fiscal year, and the most recent quarter- or half-year period.

(2) A statement in detail, on OPA Form 6062-2617,¹ of the applicant's current total unit cost of the garment for which an adjustment is being sought, the applicant's present ceiling price for the garment, the amount of the adjustment requested by the applicant and his proposed maximum price for the garment, in accordance with the standards set forth in paragraphs (a) and (b) above.

(d) **Granting of application by order.** If the Price Administrator determines that the applicant is entitled to an adjustment of his ceiling price under the standards set forth in paragraphs (a) and (b) above, he will issue an order granting such adjustment and containing such other provisions as may be deemed necessary.

(e) **Granting of application by automatic approval.** (1) For any application properly filed by a manufacturer as required by paragraph (c) above, the adjustment requested by the manufacturer in his application shall be deemed to be granted on and after the thirtieth day following the date of the mailing of the application (or on and after the thirtieth day following the date of mailing of all additional information which may have been requested by OPA), unless within that time OPA issues an order disapproving the requested adjustment or granting an adjustment under paragraph (d) above.

(2) A manufacturer whose application for adjustment is deemed to be granted under subparagraph (1) above may thereafter (but only with respect to garments belonging to the categories listed in Appendix A) make deliveries at the adjusted ceiling prices requested in the application.

(f) **Modification or revocation of adjustment.** The Price Administrator may at any time modify or revoke any adjustment granted under this supplementary order.

(g) **Denial of application.** An application may be denied, notwithstanding the standards in paragraphs (a) and (b), if price relief under an alternative method has been provided for the applicant or his industry, or if the Price Administrator determines that granting the application would not accord with the purposes of Executive Order 9599, issued by the President on August 18, 1945.

¹ Copies may be obtained from the Office of Price Administration, Consumer Goods Price Division, Washington 25, D. C.

SEC. 3. Adjustable pricing agreements—(a) Specific authorization for manufacturers who qualify for adjustments under section 2. (1) A manufacturer of any garment belonging to any of the categories listed in Appendix A, who qualifies under section 2 for an adjustment of his present ceiling price on the garment, may sell and deliver such garment at the "present ceiling price" and reserve the right to charge the difference, if any, between that ceiling price and any higher ceiling price which may thereafter be established by OPA. "Present ceiling price" is defined in section 2 (a).

However, on and after November 1, 1945, no manufacturer may sell or deliver any garment on an adjustable pricing basis, unless he has filed with OPA an application for adjustment of the garment's present ceiling price, pursuant to section 2 (c).

(2) A manufacturer, who with respect to any garment, elects to exercise the adjustable pricing permission provided in subparagraph (1) must, in connection with each contract of sale, deliver to the purchaser in writing, the statement set forth below:

For as long as permitted by OPA, _____ (name of the manufacturer) reserves the right to charge you, for the following quantities of garments delivered pursuant to this contract, the difference between our present ceiling prices and any higher ceiling prices which may thereafter be established by OPA under section 2 of Supplementary Order 137.

Lot No.	Present ceiling price	Quantity (No. of dozen)
---------	-----------------------	-------------------------

[You must price these garments in accordance with MPR 580, MPR 210, or the GMPPR (whichever regulation governs your sales of such garments). In determining your ceiling prices for resale of the garments, OPA has ruled that you must disregard the foregoing adjustable pricing clause and any additional charge made pursuant to it, unless and until specifically authorized otherwise by OPA. Thus, under MPR 580 and MPR 210, you may not include any such additional charge as part of your cost base; under the GMPPR, you may not add the amount of any such charge to your existing GMPPR ceiling prices.]²

(b) **Specific authorization for wholesalers purchasing from manufacturers who have adjustable prices.** A wholesaler who purchases garments from a manufacturer who has exercised the adjustable pricing permission granted under paragraph (a) may, in connection with such garments, sell and deliver them to retailers at the ceiling prices in effect on November 9, 1944, and reserve the right to charge the difference, if any, between such ceiling prices and any higher ceiling prices which may there-

² If this statement is sent to wholesalers, substitute the following for the paragraph in brackets:

Pursuant to section 3 (b) of SO 137, you may sell and deliver these garments to retailers at your ceiling prices in effect on November 9, 1944 and reserve the right to charge the difference, if any, between them and any higher ceiling prices which may thereafter be established by OPA, as a result of adjusting our prices to you. If you elect to use this permission, you must deliver to the purchaser the statement set forth in section 3 (b) of SO 137.

after be established by OPA. However, the wholesaler must, with each contract of sale, deliver to the purchaser, in writing, the statement set forth below:

For as long as permitted by OPA, (name of wholesaler) reserves the right to charge you, for the following quantities of garments delivered pursuant to this contract, the difference between our ceiling prices in effect on November 9, 1944 and any higher ceiling prices which may thereafter be established by OPA, as a result of adjustment of our supplier's price to us under section 2 of Supplementary Order 137.

Lot. No.	Ceiling price on November 9, 1944	Quantity

You must price these garments in accordance with MPR 580, MPR 210, or the GMPR (whichever regulation governs your sales of such garments). In determining your ceiling prices for resale of the garments, OPA has ruled that you must disregard the foregoing adjustable pricing clause and any additional charge made pursuant to it, unless and until specifically authorized otherwise by OPA. Thus, under MPR 580 and MPR 210, you may not include any such additional charge as part of your cost base; under the GMPR, you may not add the amount of any such charge to your existing GMPR ceiling prices.

(c) *Restrictions.* (1) The permission granted in paragraphs (a) and (b) shall remain in effect only until the date adjusted ceiling prices, pursuant to section 2, are first hereafter established for the manufacturer's sales, or these paragraphs are revoked, whichever is earlier.

(2) Any purchaser, except a wholesaler making sales to retailers, who buys garments under a contract containing an adjustable pricing clause shall disregard that clause, and any additional charge made pursuant to it, in determining his ceiling prices for resale of the garments so purchased.

Sec. 4. *Revocation of former orders.* Revised Supplementary Order 99 (Adjustment of Maximum Prices for Specified Knitted Underwear Garments Manufactured pursuant to Direction of War Production Board) and all individual price adjustments granted pursuant thereto, prior to October 17, 1945, are hereby revoked.

APPENDIX A—WHAT GARMENT CATEGORIES ARE COVERED BY THIS ORDER

This supplementary order covers knitted garments which belong to any of the categories listed below. For purposes of this order, a knitted garment is a garment of which the body fabric is made of 50 per cent or more knit fabric by weight, and the fiber content of such body fabric is 100 per cent cotton yarn or a mixture of cotton and wool yarn which contains not less than 50 per cent cotton yarn.

Categories of knitted garments:

(a) Men's union suits, finished weight of 12 pounds and over per dozen (weight calculated on size 42), long sleeve, ankle length.

(b) Boys' union suits, finished weight 7 pounds and over per dozen (weight calculated on size 34), long sleeve, ankle length.

(c) Men's shirts and drawers, finished weight of 6 pounds and over per dozen (weight calculated on size 42 long sleeve shirt).

(d) Boys' shirts and drawers, finished weight of 5 pounds and over per dozen (weight calculated on size 34 long sleeve shirt).

(e) Women's and misses' union suits, finished weight of 6 pounds and over per dozen (weight calculated on size 38) high neck, long sleeve, ankle length.

(f) Children's waist suits, finished weight of 5 pounds and over per dozen (weight calculated on size 12).

(g) Children's union suits, finished weight of 6 pounds and over per dozen (weight calculated on size 16), long sleeve, ankle length.

(h) Children's sleepers.

(i) Infants' pants, made of 22's yarn and heavier.

NOTE: Where the category description lists long sleeve or ankle length, it includes garments made short sleeve or knee length, if such garments are made of the same weight fabric as that specified for garments otherwise the same made long sleeve, ankle length.

This supplementary Order No. 137 shall become effective October 17, 1945.

NOTE: Approval of the reporting requirements of this supplementary order has been waived by the Bureau of the Budget.

Issued this 17th day of October 1945.

PART 1351—FOOD AND FOOD PRODUCTS

[RMFR 289,² Amdt. 36]

DAIRY PRODUCTS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation 289 is amended in the following respects:

1. Section 1 (q) is added to read as follows:

(q) *Processed cheese, cheese foods and cheese spreads.*

2. Section 35 is added to read as follows:

SEC. 35. *Maximum prices for processed cheese, cheese food and cheese spreads (except those covered by other sections of this regulation)—(a) Purposes of section 35—(1) Generally.* Section 35 establishes a method for placing all processed cheese, cheese foods and cheese spreads, except those covered by other sections of this regulation, under dollar-and-cents ceiling prices at all levels except retail sales by retailers subject to Maximum Price Regulations Nos. 422 and 423. Generally, this is accomplished by computing a maximum base price by application of the pricing method hereinafter set forth. However, those products subject to this section which were sold during the base period, September 28 to October 2, 1942, inclusive, are not required to be priced according to the pricing method, but will retain their respective maximum prices established in said base period.

(2) *Prior regulations, orders, letters and interpretations superseded.* This section supersedes all other maximum price regulations, orders, letters and interpretations and the maximum prices established thereunder or thereby issued by the Office of Price Administration or any Regional or District Office thereof before October 23, 1945, with respect to sales of cheese items covered by this section, including the applicable provisions of Maximum Price Regulation No. 280: *Provided, That such maximum price reg-*

ulations, orders, letters and interpretations shall remain in force with respect to a particular sale of a cheese item covered by this section until provisions of this section become applicable thereto.

(b) *Pricing each cheese item.* (1) Each manufacturer subject to this section shall remain subject to Maximum Price Regulation No. 280 with respect to each of his cheese items until he has filed a maximum base price for such cheese item under paragraph (e) or until 30 days after the effective date of this section, whichever is earlier.

(2) *Division of cheese items.* Each manufacturer must separately price all cheese items he sells according to the group to which the cheese item belongs as follows:

(i) Cheese items which he sold or offered for sale during the base period, September 28 to October 2, 1942, inclusive.

(ii) Cheese items sold or offered for sale subsequent to October 2, 1942.

(3) *Definition of "cheese item".* "Cheese item" as that term is used in this section means any processed cheese, cheese food or cheese spread previously covered by Maximum Price Regulation No. 280 (except those covered by other sections of this regulation) of a particular brand name, container size and formula. One cheese item shall not be considered the same as another if there is any difference in:

(i) Their brand names and item names, or

(ii) The names of their manufacturers, or

(iii) Their container sizes, or

(iv) Their type of package or container, or

(v) Their formulae, or

(vi) Information required to be contained on their labels in accordance with the provisions of the Food, Drug and Cosmetic Act of 1938 or regulations issued thereunder.

(c) *Determination of ingredient, container and packaging prices.* Each manufacturer required to determine a maximum base price for a cheese item not sold by him during the base period September 28 to October 2, 1942 inclusive under paragraph (d) (2) hereof is required to determine his maximum base price by use of the price of each ingredient in the cheese item and the price of the container or packaging material or both in which the item is packed. This paragraph sets forth rules for determining the ingredient, container and packaging prices.

(1) *Natural cheese subject to RMFR 289.* For any natural cheese ingredient the price for which is determined under Revised Maximum Price Regulation 289 the manufacturer shall use the maximum price per pound established by that regulation for sales made in Wisconsin to processors by a cheese maker, or cheese factory or assembler whichever is higher.

(2) *Natural cheese subject to MPR 280.* (i) For any natural cheese ingredient the price for which is determined under Maximum Price Regulation 280 and which the manufacturer purchases, he shall use the maximum price per

pound, f. o. b. the cheese factory, established under that regulation by its manufacturer.

(ii) For any natural cheese ingredient the price for which is determined under Maximum Price Regulation 280 and which is made by a manufacturer and used by him in making any cheese item covered by this section, he shall use the maximum price established by him under the provision of that regulation for sales f. o. b. his factory to processors: *Provided, however*, That the price so used and the manner of its determination shall be filed with the Secretary of the Office of Price Administration in Washington, D. C. at the time the manufacturer files his maximum base price under paragraph (e) of this section.

(3) *Ingredients other than natural cheese subject to price control.* For any ingredient other than natural cheese, subject to any maximum price regulation, the manufacturer shall use the maximum price established by the applicable regulation for sales delivered at his factory for customary purchases from customary suppliers.

(4) *Ingredients not subject to price control.* For any ingredient not subject to price control the manufacturer shall use either the reasonable market value of such ingredient as of October 23, 1945 delivered at his factory purchased from a customary supplier in customary quantities, or the simple average of the prices paid by him for that ingredient delivered at his plant for either

(i) His receipts for July, 1945.

(ii) His last 20 receipts prior to October 23, 1945, or

(iii) His last year's receipts prior to October 23, 1945.

(5) *Container and packaging material prices.* For any containers or packaging materials the manufacturer shall use the maximum price he could lawfully pay, if subject to price control, or the reasonable market value if not subject to price control, delivered to his plant from customary or normal suppliers of such containers or packaging material.

(6) *Averaging prices at separate plants.* Where a person manufactures a cheese item in more than one plant, in determining his various costs and his price for ingredients, he shall take the weighted averages of the costs and prices of the ingredients determined at each of his plants in accordance with the provisions of this paragraph. The weighted average cost and price shall be used by him in determining his maximum base price.

(d) *Establishment of maximum base prices.*—(1) *For cheese items sold during September 28 to October 2, 1942, inclusive.* The maximum base price for any cheese item sold during the period September 28 to October 2, 1942, inclusive shall be the highest price charged by the seller for the sale of the same cheese item during that period to a purchaser of the same class, or if he made no delivery during such period, his highest offering price for delivery during that period to a purchaser of the same class. The seller may therefore have different maximum base prices for different classes of purchasers.

(2) *Establishment of a maximum base price for each cheese item not sold by a manufacturer between September 28 to October 2, 1942, inclusive.* Each manufacturer of a cheese item not sold by him during the period September 28, to October 2, 1942 inclusive, shall determine a maximum base price for that item which shall be the total of the following, not, however, to exceed the maximum price established by him for that cheese item under § 1351.803 of Maximum Price Regulation 280:

(i) *Natural cheese ingredients.* He shall multiply the percentages of all natural cheeses used as an ingredient in the item being priced by the price per pound for the respective natural cheeses determined in accordance with paragraph (c) of this section.

(ii) *Ingredients other than natural cheese.* He shall multiply the percentages of all ingredients other than natural cheese used as an ingredient in the cheese item being priced by the prices per pound for the respective ingredients other than natural cheese determined in accordance with paragraph (c) of this section.

(iii) *Cleaning losses.* He shall determine his cleaning losses for the item per pound based upon his actual operations.

(iv) *Container costs.* He shall determine the price of the container or packaging material or both in which the item is packed in accordance with paragraph (c) of this section.

(v) *Manufacturing costs.* The sum of 2½¢ per pound shall include all other costs and profit, including but not limited to direct labor, shrinkage, grinding, blending, pasteurizing and packaging.

(vi) *Differentials for size.* The additions provided by this subparagraph may be added to, and the deductions provided by this subparagraph must be subtracted from, the total of items (i) through (v) of this paragraph. The sum arrived at by totaling subparagraphs (i) through (v) inclusive includes the cost of placing the finished product in container sizes varying from over ½ pound to 2 pounds for processed cheese and processed cheese foods and 8 ounces or less for cheese spreads.

(a) *Processed cheese and processed cheese food.* (1) For processed cheese and processed cheese food items in packages weighing ½ pound or less, add 1¾ cents per pound.

(2) For processed cheese and processed cheese food items in packages weighing over 2 pounds deduct 1 cent per pound.

(b) *Processed cheese spreads.* (1) For processed cheese spread items packed in containers and weighing over eight ounces but not more than two pounds deduct ¼¢ per pound.

(2) For processed cheese spread items packed in containers and weighing over two pounds deduct 1¢ per pound.

(e) *Filing of maximum base prices.* (1) On each cheese item for which a manufacturer has computed a maximum base price under paragraph (d) of this section, he shall within 30 days from the effective date of this section file his maximum base prices together with his computations showing how he arrived at

his maximum base prices with the Secretary of the Office of Price Administration at Washington, D. C.

(2) *Prohibition against selling until maximum base prices are filed.* No manufacturer subject to this section shall sell any cheese item after 30 days from the effective date of this section until he has filed a maximum base price for such cheese item.

(3) *Information to be filed.* (i) For maximum base prices determined under paragraph (d) (1) of this section each seller shall file the following information:

(a) Brand name and name of item.

(b) Name and address of the manufacturing plant, or if more than one plant manufactures the cheese item, then the names and addresses of all the plants where the cheese item is manufactured (Applicable only to manufacturers of the cheese item).

(c) Container size.

(d) Type of package or container.

(e) Information contained on label, if any.

(f) The maximum base price for each class of customer.

(ii) For maximum base prices determined under paragraph (d) (2) of this section, each manufacturer shall file the following information:

(a) Brand name and name of item.

(b) Name and address of the manufacturing plants, or if more than one plant manufactures the cheese item, then the names and addresses of all the plants where the cheese item is manufactured.

(c) Container size.

(d) Type of package or container.

(e) Information contained on label, if any.

(f) List of ingredients.

(g) Percentage or amount and price of each ingredient contained in each cheese item.

(h) Amount and cost of cleaning losses, on per pound basis.

(i) Container and packing material costs.

(j) The resulting maximum base price.

(4) All filings shall be considered as confidential information and the contents thereof shall not be disclosed or divulged except upon order of the Administrator upon a finding that such disclosure is necessary to effectuate the purposes of the Emergency Price Control Act, as amended and Executive Orders 9250 and 9328.

(f) *Approval or disapproval of filed maximum base prices.* (1) The Administrator may approve by letter order any filed price upon a finding that it was correctly determined under the provisions of this section.

(2) The Administrator may disapprove by letter order any filed price upon a finding that it was incorrectly determined and is in excess of the maximum base price as correctly determined. The order of disapproval shall specify an allowed maximum base price in lieu of the maximum base price filed by the manufacturer.

(3) Any filed maximum base price determined in good faith pursuant to the provisions of this section, which has not been disapproved within 30 days after such filing, shall thereafter be deemed

to be approved; provided that the Administrator may by letter order subsequently disapprove such maximum base price and, if it is subsequently disapproved, it shall be treated as disapproved for the purpose of sales or deliveries made subsequent to its disapproval.

(g) *Maximum prices*—(1) *For cheese items sold during September 28 to October 2, 1942, inclusive.* The maximum price for the sale or delivery of any cheese item sold by any seller during the period September 28 to October 2, 1942 inclusive to each class of customer shall be his maximum base price determined under paragraph (d) (1) of this section for sales to the respective classes of customers.

(2) *For cheese items not sold during September 28 to October 2, 1942, inclusive*—(i) *Manufacturers*—(a) *In Wisconsin.* The manufacturer's maximum price for the sale of any cheese item delivered in Wisconsin (which cheese item was not sold by him during the base period of September 28 to October 2, 1942 inclusive) shall be his maximum base price computed for that cheese item under paragraph (d) (2) of this section.

(b) *Outside Wisconsin.* The manufacturer's maximum price for the sale of any cheese item delivered at any place outside Wisconsin (which cheese item was not sold by him during the base period of September 28 to October 2, 1942 inclusive) shall be his maximum base price computed for that cheese item under immediately preceding subdivision (a) plus a "transportation factor."

(c) Notwithstanding any other provision of this section no manufacturer shall sell or deliver any cheese item which was not sold prior to October 23, 1945, unless the maximum base price for such cheese item has been approved or determined by order issued by the Administrator or has been approved under paragraph (f) (3) of this section.

(ii) *Wholesalers*—(a) *Sales by a "primary wholesaler"*—(1) *Definition.* A "primary wholesaler" is a person who sells to a wholesaler or to a retailer distributing warehouse.

(2) *In Wisconsin.* The maximum price for the sale of any cheese item covered by this section by a "primary wholesaler" delivered at any place in Wisconsin, and not sold by him during the base period September 28 to October 2, 1942, inclusive, shall be the manufacturer's maximum price as determined under paragraph (g) of this section, plus $\frac{1}{2}\text{¢}$ per pound.

(3) *Outside Wisconsin.* The maximum price for the sale of any cheese item covered by this section by a "primary wholesaler" delivered at any place outside Wisconsin, and not sold by him during the base period September 28 to October 2, 1942, inclusive, shall be the maximum price set forth in immediately preceding subdivision (2) above, plus a "transportation factor."

(b) *Sales by a "non-delivering wholesaler"*—(1) *Definition.* A "non-delivering wholesaler" is a person who sells to and does not make delivery to the physical premises of an individual retail store or to an individual commercial, industrial, institutional or non-federal gov-

ernmental user. No person shall be deemed a "non-delivering wholesaler" unless he owns or maintains a warehouse within a distance of 50 miles from the physical premises of the above described purchaser. The physical premises of an individual retail store means the place where "cheese items" are sold to ultimate household users. The physical premises of an individual commercial, industrial, institutional, or non-federal governmental user means the place where "cheese items" are consumed by such user.

(2) *In Wisconsin.* The maximum price for the sale of any cheese item covered by this section by a "non-delivering wholesaler" delivered at any place in Wisconsin, and not sold by him during the base period September 28 to October 2, 1942, inclusive, shall be the manufacturer's maximum price as determined under paragraph (g) of this section, plus 2¢ per pound.

(3) *Outside Wisconsin.* The maximum price for the sale of any cheese item covered by this section by a "non-delivering wholesaler" delivered at any place outside Wisconsin, shall be the maximum price set forth in immediately preceding subdivision (2) above, plus a "transportation factor."

(c) *Sales by a "service wholesaler"*—(1) *Definition.* A "service wholesaler" is a person who sells to and makes delivery to the physical premises of an individual retail store or an individual commercial, industrial, institutional or non-federal governmental user. No person shall be deemed a "service wholesaler" unless he owns or maintains a warehouse in the marketing area in which the physical premises of the above described purchasers are located. The physical premises of an individual retail store means the place where "cheese items" are sold to ultimate household users. The physical premises of an individual commercial, industrial, institutional, or non-federal governmental user means the place where "cheese items" are consumed by such user. *Provided, however,* That the physical premises of a municipally operated central kitchen preparing lunches for non-profit distribution to school children shall be deemed the physical premises of an institutional user.

(2) *In Wisconsin.* The maximum price for the sale of any cheese item covered by this section by a "service wholesaler" delivered to the physical premises of a purchaser (designated in subdivision (1) of this paragraph) at any place in Wisconsin, and not sold by him during the base period September 28 to October 2, 1942 inclusive, shall be the manufacturer's maximum price determined under paragraph (g) of this section, plus 3¢ per pound.

(3) *Outside Wisconsin.* The maximum price for the sale of any cheese item by a "service wholesaler" delivered to the physical premises of a purchaser (designated in subdivision (1) of this subparagraph), at any place outside Wisconsin, and not sold by him during the base period September 28 to October 2, 1942 inclusive, shall be the maximum price set forth in immediately preceding

subdivision (2) above, plus a "transportation factor."

(h) *Calculations.* All calculations of any "transportation factor" and of any maximum price established by this section shall be made on a cents per pound basis and shall be carried to the second decimal point. The price per pound carried to the second decimal point shall be multiplied by the number of pounds sold and the total price then adjusted to the nearest cent, or the next higher cent where the total price ends with a decimal point of .50.

(i) *Discounts and allowances.* The maximum prices established in the foregoing paragraphs of this section must be reduced by the customary discounts or allowances for cash or prompt payment. However, any change in customary discounts, allowances or other price differentials may always be made when it results in a lower price than would the customary discounts or allowances.

(j) *Maximum prices for sales at retail by manufacturers and wholesalers.* (1) The maximum price for the sale at retail of any cheese item delivered at any place by a manufacturer, primary wholesaler, or service wholesaler, shall be the appropriate maximum price established in that place for a sale by a manufacturer as set forth in paragraph (g) of this section plus 27%.

(2) No sale to any person of a quantity in excess of 5 pounds shall be considered a sale at retail.

(k) *Maximum prices for sales not already provided for.* The maximum price for the sale or delivery in any place of any cheese item for which a maximum price is not established by this section shall be the maximum price established for sales by manufacturers of that cheese item in that place by paragraph (g) of this section.

(l) *Adjustments and price determination.* (1) The Administrator of the Office of Price Administration on his own motion may at any time by amendment, general order or letter order disapprove or revise any maximum base price or maximum price for any cheese item proposed or established under this section so as to bring it into line with the level of maximum prices otherwise established for cheese items by this regulation.

(2) Any manufacturer whose maximum base price is determined under paragraph (d) (1) of this section may make application for an adjustment in his established maximum base price so as to bring it into line with the level of maximum base prices determined for the same cheese item under paragraph (d) (2) of this section. Such an application must be filed in accordance with the provisions of Revised Procedural Regulation No. 1 and must contain all the information required by paragraph (d) (2) and (e) (4) of this section for the determination of a maximum base price thereunder.

(3) Any manufacturer who is unable to determine his maximum base price for a cheese item under the provisions of paragraph (d) of this section may make application to the Administrator for the establishment of a maximum base price. Such an application shall be filed in accordance with the provisions of Revised

Procedural Regulation No. 1, as amended, and must show in addition to the information required by paragraph (d) (2) and (e) (4) of this section, the reasons why the applicant cannot determine his price under paragraph (d) of this section.

(m) *Definitions*—(1) *Processed cheese*. Processed cheese is any natural cheese which has been graded, cleaned, blended, ground, pasteurized and packaged but which is not controlled by other sections of this regulation. It shall contain not less than the butterfat contained in the natural cheese being processed with a 1% tolerance on moisture. Any variation in butterfat or moisture content shall for the purposes of this section result in the product being considered a processed cheese food subject to the provisions of this section.

(2) *Processed cheese food and processed cheese spread*. Processed cheese food or processed cheese spread is a blend of two or more natural cheeses with emulsifying agents and with the optional addition of fillers, stretchers, condiments or relishes and other non-cheese ingredients, which natural cheeses have been graded, cleaned, blended, ground, packaged and which may, or may not, be cooked or pasteurized. Processed cheese food is distinguished from processed cheese spread by its moisture content, which normally does not exceed 50% while the moisture content in processed cheese spread normally exceeds 50%.

(3) *"Transportation factor"*. "Transportation factor" means the lowest published railroad carlot freight rate per pound gross weight from Plymouth, Wisconsin, to the place of delivery multiplied by 1.15. In calculating transportation charges referred to in the foregoing paragraphs, the 3% transportation tax imposed by section 620 of the Revenue Act of 1942 shall be included.

(4) *"Delivered at any place"*. The phrase "delivered at any place" comprehends all sales whether made on the basis of actual delivery to the point of shipping destination or on the basis of f. o. b. shipping point or some other point. Sales f. o. b. any point shall be considered delivered at that point.

(5) *"Place"* means any city, town, village or hamlet within the United States.

(6) *"Retailer distributing warehouse"* means a place where cheese is received and held for disposition to retail stores. Chain store warehouses and retailer owned cooperative warehouses are included in the meaning of "retailer distributing warehouse."

(n) *Evasive practices prohibited*. The provisions of this section shall not be evaded whether by direct or indirect methods in connection with an offer, solicitation, agreement, sale, delivery, purchase, or receipt of, or relating to any cheese item alone or in conjunction with any other commodity, or by way of any commission, service, transportation or other charge or discount, premium or other privilege, or by tying-agreement or other trade understanding or by changing a business practice relating to grading, labeling, packaging or branding of a cheese item.

Any change in the type or amount of ingredients, container type or size or any

other material change in the composition of a cheese item for which a manufacturer has filed his maximum base price with the Office of Price Administration shall be considered as an evasion of the provisions of this section unless the manufacturer shall redetermine and file his maximum base price for the cheese item so changed.

NOTE: All record-keeping and reporting requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This Amendment shall become effective October 23, 1945.

and filed with the Division of the Federal Register.

Revised Price Schedule 50 is amended in the following respects:

1. The introductory text of § 1351.1 (a) is amended to read as follows:

(a) On and after December 11, 1941, or the effective date thereof as to any amendment to this schedule, regardless of any contract or obligation:

No person shall sell, offer to sell, attempt to sell, deliver, or transfer green coffee at prices higher than the maximum prices hereinafter established by this schedule; and

No person shall by direct or indirect methods, buy, offer to buy, attempt to buy, import or receive, green coffee in the course of trade or business, individually or through any agent, or through a foreign or a domestic corporation or any foreign or domestic subsidiary thereof partly or solely owned or controlled by such person, at prices higher than the maximum prices established in this schedule; except:

2. Section 1351.7 (a) is amended to read as follows:

(a) "Person" includes an individual, corporation, partnership, association, or any other organized group of persons, or legal successor or representative or subsidiary of any of the foregoing, and includes the United States or any agency thereof, or any other government, or any of its political subdivisions, or any agency of any of the foregoing.

MEAT, FATS, FISH AND CHEESES

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

A new section 11.17a is added as follows:

SEC. 11.17a *Reclaimed butter oil may be transferred point-free under certain conditions.* (a) When used in this section, the term "butter oil" means "butter" which contains more than 95% of fat, by weight.

(b) Butter oil may be transferred and acquired point-free by any person if it has been reclaimed, under the direct supervision of a municipal, state, or federal official, from butter condemned as unfit for human consumption by a municipal, state, or federal court or health authority. The transferor shall keep a record of the name and address of the transferee, the name and address of the owner of the butter when it was condemned, the court or agency which condemned the butter, and the place and date of the proceeding in which it was condemned.

(c) Notwithstanding the provisions of section 7.8 of this order or those of section 15.2 of General Ration Order 5, an industrial or institutional user who uses butter oil which he acquired point-free under this section in any allotment period may also use his full allotment for that period plus any unused part of previous allotments.

This amendment shall become effective October 19, 1945.

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 10—INSURANCE

NATIONAL SERVICE LIFE INSURANCE; REINSTATEMENT

§ 10.3422 *Reinstatement of National Service Life Insurance.* Subject to the provisions of the National Service Life Insurance policy, or any amendment or supplement thereto, any insurance which has lapsed, or may hereafter lapse, and which has not been surrendered for a cash value or for paid-up insurance, may be reinstated upon written application signed by the applicant, and, except as hereinafter provided, upon payment of all premiums in arrears, with interest from their several due dates at the rate of 5 per centum per annum, compounded annually, provided such applicant at the time of application and tender of premiums is in the required state of health as shown in paragraphs (a), (b) or (c) of § 10.3423, whichever is applicable, and submits evidence thereof at the time of application and tender of premiums as may be satisfactory to the Administrator of Veterans Affairs: *Provided*, That during the present war and for six months thereafter the reinstatement of National Service Life Insurance on the five-year level premium term plan may be effected by written application of the insured accompanied by evidence of insurability and tender of two monthly premiums without interest: *Provided further*, That any five-year level premium term policy which is reinstated without payment of all premiums in arrears with interest shall have no reserve value: *Provided further*, That, except as otherwise provided in § 10.3484, application for reinstatement of a five-year level premium term policy, accompanied by evidence of insurability and tender of premiums must be submitted prior to the expiration of the five-year term period: *Provided further*, That the payment or reinstatement of any indebtedness against any policy must be made, and if such indebtedness with interest exceeds the reserve of the policy at the time of application for reinstatement thereof, then the amount of such excess shall be paid by the applicant as a condition of the reinstatement of the indebtedness and of the policy: *And, provided further*, That a lapsed National Service Life Insurance policy which is in force under extended term insurance may be reinstated without health statement or other medical evidence, if application and tender of premiums with interest are made not less than five years prior to the date such extended insurance would expire.

CHANGE IN PLAN

§ 10.3433 *Exchange of a five-year level premium term policy as of a current effective date.* Subject to the provisions of § 10.3484, National Service Life Insurance on the five-year level premium term plan which has been in force at least one year may be exchanged, effective as of the date any premium becomes due within the five-year term period, for insurance of the same amount on

any other plan issued by the Veterans' Administration under the National Service Life Insurance Act, 1940, upon payment by the insured (except where premium waiver is effective) of the current monthly premium at the attained age of the insured for the plan of insurance selected. The reserve (if any) on the policy will be allowed as a credit on the current monthly premium except where premium waiver is effective. Such exchange will be made without medical examination and upon complete surrender of the policy while in force by payment or waiver of premiums.

§ 10.3434 *Exchange of a five-year level premium term policy as of a date prior to the current month.* Subject to the provisions of § 10.3484, National Service Life Insurance on the five-year level premium term plan which has been in force at least one year may be exchanged, effective as of the date any premium has become due within the five-year term period, for insurance of the same amount on any other plan issued by the Veterans' Administration under the National Service Life Insurance Act, 1940, upon payment by the insured of the difference between the reserve on the new policy and the reserve on the old policy and payment by the insured (except where premium waiver is effective) of the current monthly premium at the attained age of the insured as of the effective date of the new policy. Such exchange will be made without medical examination and upon complete surrender of the policy while in force by payment or waiver of premiums: *Provided*, Waiver of the premiums on the new policy shall not be effective prior to the date such policy change was made.

EXTENSION OF FIVE-YEAR LEVEL PREMIUM TERM POLICIES

§ 10.3484 *Five year level premium term insurance as extended by public No. 118, 79th Congress.* National Service Life Insurance on the five-year level premium term plan issued on or before December 31, 1945, and not exchanged or converted to another plan may be continued for an additional three-year period dating from the expiration of the original five-year term, and the premiums the insured is required to pay for term insurance during such additional period shall be the same as were required during the original five-year term; insurance will be deemed to have been issued on or before December 31, 1945, if such insurance was applied for and made effective on or before that date: *Provided*, That such term insurance may be exchanged or converted effective as of the date any premium becomes or has become due during the five year term period as extended by Public No. 118, 79th Congress, but in all other respects conversion will be effected in accordance with the requirements of §§ 10.3433 or 10.3434, whichever may be applicable: *Provided further*, That any such term insurance which has lapsed or may hereafter lapse may be reinstated at any time prior to the expiration of the five-year term period as extended, but in all other respects reinstatement will be effected in accordance with the requirements of

§§ 10.3422, 10.3423 and 10.3424: *And provided further*, That if any such policy be not exchanged or converted to a permanent plan prior to the expiration of the five-year term period as extended, all protection thereunder shall cease. (59 Stat. 315).

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

PART 3—STANDARD AND HIGH FREQUENCY BROADCAST STATIONS

STANDARDS OF GOOD ENGINEERING PRACTICE CONCERNING FM BROADCAST STATIONS

There are presented herein the Commission's engineering standards relating to the allocation and operation of FM broadcast stations. These standards also apply to noncommercial educational (FM) broadcast stations, except as noted herein. The Commission's rules and regulations contain references to these standards, which have been approved by the Commission and thus are considered as reflecting its opinion in all matters involved.

The standards set forth herein are those deemed necessary for the construction and operation of FM broadcast stations to meet the requirements of technical regulations and for operation in the public interest along technical lines not otherwise enunciated. These standards are based upon the best engineering data available, including evidence at hearings, conferences with radio engineers, and data supplied by manufacturers of radio equipment and by licenses of FM broadcast stations. These standards are complete in themselves and supersede previous engineering standards or policies of the Commission concerning FM broadcast stations. While these standards provide for flexibility and indicate the conditions under which they are applicable, it is not expected that material deviation from the fundamental principles will be recognized unless full information is submitted as to the need and reasons therefor.

These standards will necessarily be revised from time to time as progress is made in the art. The Commission will accumulate and analyze engineering data available as to the progress of the art so that these standards may be kept current with technical developments.

SECTION 1. Definitions—A. FM broadcast station. The term "FM broadcast station" means a station employing frequency modulation in the FM broadcast band and licensed primarily for the transmission of radiotelephone emissions intended to be received by the general public.

B. Frequency modulation. The term "frequency modulation" means a system of modulation where the instantaneous radio frequency varies in proportion to the instantaneous amplitude of the modulating signal (amplitude of modulating signal to be measured after pre-emphasis, if used) and the instantaneous radio frequency is independent of the frequency of the modulating signal.

C. FM broadcast band. The term "FM broadcast band" means the band of frequencies extending from 88 to 108 megacycles, which includes those assigned to noncommercial educational broadcasting.

D. Center frequency. The term "center frequency" means:

(1) The average frequency of the emitted wave when modulated by a sinusoidal signal.

(2) The frequency of the emitted wave without modulation.

E. Frequency swing. The term "frequency swing" means the instantaneous departure of the frequency of the emitted wave from the center frequency resulting from modulation.

F. FM broadcast channel. The term "FM broadcast channel" means a band of frequencies 200 kilocycles wide and is designated by its center frequency. Channels for FM broadcast stations begin at 88.1 megacycles and continue in successive steps of 200 kilocycles to and including 107.9 megacycles.

G. Antenna field gain. The term "antenna field gain" of an FM broadcast antenna means the ratio of the effective free space field intensity produced at one mile in the horizontal plane expressed in millivolts per meter for 1 kilowatt antenna input power to 137.6 mv/m.

H. Free space field intensity. The term "free space field intensity" means the field intensity that would exist at a point in the absence of waves reflected from the earth or other reflecting objects.

I. Multiplex transmission. The term "multiplex transmission" means the simultaneous transmission of two or more signals within a single channel. Multiplex transmission as applied to FM broadcast stations means the transmission of facsimile or other signals in addition to the regular broadcast signals.

J. Percentage modulation. The term "percentage modulation" as applied to

frequency modulation means the ratio of the actual frequency swing to the frequency swing defined as 100 percent modulation, expressed in percentage. For FM broadcast stations, a frequency swing of ± 75 kilocycles is defined as 100 percent modulation.

K. Effective radiated power. The term "effective radiated power" means the product of the antenna power (transmitter output power less transmission line loss) times (1) the antenna power gain, or (2) the antenna field gain squared.

L. Service area. The term "service area" as applied to FM broadcasting means the service resulting from an assigned effective radiated power and antenna height above average terrain.

M. Antenna height above average terrain. The term "antenna height above average terrain" means the average of the antenna heights above the terrain from two to ten miles from the antenna. (In general a different antenna height will be determined by each direction from the antenna. The average of these various heights is considered as the antenna height above average terrain.)

Sec. 2. Engineering standards of allocation. A. Sections 3.202 to 3.205 inclusive of the rules and regulations describe the basis for allocation of FM Broadcast Stations, including the division of the United States into Areas I and II. Where reference is made in the rules to antenna heights of Community Stations, section 2 E (1) of these Standards should be consulted; for other classes of FM broadcast Stations, section 2 E (2) should be consulted.

As noted in § 3.204 (b) of the rules, the Commission will designate service areas for Metropolitan Stations in Area II. In addition to the showing required by this rule a special showing must be included in the application concerning the area proposed to be served, in the event that (1) such area is smaller than the service area designated by the Commission, or (2) such area is smaller than that which would appear to be the appropriate service area, in cases where it has not been designated by the Commission. The proposed area to be served must be substantially greater than that which could be served by a Community station.

B. In determining the predicted and measured field intensity contours of FM broadcast stations the following shall govern:

(1) Community stations will normally not be required to determine their contours.

(2) Metropolitan stations shall determine the extent of their 1000 uv/m and 50 uv/m contours.

(3) Rural stations shall determine their 1000 uv/m, 50 uv/m and 20 uv/m contours.

The above contours shall be determined in accordance with the methods prescribed in these Standards.

C. Although some service is provided by tropospheric waves, the service area is considered to be only that served by the

¹ The 20 uv/m contour is desired in this case for use by the Commission in determining the usability of a signal of such low intensity.

ground wave. The extent of the service is determined by the point at which the ground wave is no longer of sufficient intensity to provide satisfactory broadcast service. The field intensity considered necessary for service is as follows:

TABLE I

Area:	Median field intensity
City business or factory areas...	1000 uv/m
Rural areas.....	50 uv/m

A median field intensity of 3000 to 5000 uv/m should be placed over the principal city to be served, and a median field intensity of 1000 uv/m should be placed over the business district of cities of 10,000 or greater within the metropolitan district served. The field intensity to be provided over the main studio is specified by §§ 3.203, 3.204, and 3.205 of the rules.

These figures are based upon the usual noise levels encountered in the several areas and upon the absence of interference from other FM stations.

D. A basis for allocation of satellite stations has not yet been determined. For the present, applications will be considered on their individual merits.

E. The service area is predicted as follows:

(1) **Community stations.** A map, topographic where obtainable, shall be submitted for the area within 15 miles of the proposed antenna site. On this map shall be indicated the antenna location and a circle of 10 miles radius with the antenna location as center. Representative points shall be picked on this circle 15 degrees apart and the elevation of these points determined. The average elevation of these points will be considered the average elevation of the circle. The difference between the elevation of the center of the radiating system and the average elevation of this circle shall be considered the height of the antenna over the terrain 10 miles from the transmitter. In cases where the applicant believes this method to be grossly in error due to peculiarities of the terrain, this method shall be used for determining the antenna height but a showing may be made, if desired, determining the height by other means and describing the method used. Calculations of the service contours of Community stations are not required.

(2) **Metropolitan and rural stations.** Profile graphs must be drawn for at least eight radials from the proposed antenna site. These profiles should be prepared for each radial beginning at the antenna site and extending to ten miles therefrom. Normally the radials are drawn for each 45° of azimuth; however, where feasible the radials should be drawn for angles along which roads tend to follow. (The latter method may be helpful in obtaining topographical data where otherwise unavailable, and is particularly useful in connection with mobile field intensity measurements of the station and the correlation of such measurements with predicted field intensities). In each case one or more radials must include the principal city or cities to be served, particularly in cases of rugged terrain, even though the city may be more than 10 miles from the an-

tenna site. The profile graph for each radial should be plotted by contour intervals of from 40 to 100 feet and, where the data permits, at least 50 points of elevation (generally uniformly spaced) should be used for each radial. In instances of very rugged terrain where the use of contour intervals of 100 feet would result in several points in a short distance, 200 or 400 foot contour intervals may be used for such distances. On the other hand, where the terrain is uniform or gently sloping the smallest contour interval indicated on the topographic map (see below) should be used, although only a relatively few points may be available. The profile graph should accurately indicate the topography for each radial, and the graphs should be plotted with the distance in miles as the abscissa and the elevation in feet above mean sea level as the ordinate. The profile graphs should indicate the source of the topographical data employed. The graph should also show the elevation of the center of the radiating system. The graph may be plotted either on rectangular coordinate paper or on special paper which shows the curvature of the earth into consideration in this procedure, as this factor is taken care of in the chart showing signal intensities (Figure 1).

The average elevation of the eight mile distance between two and ten miles from the antenna site should then be determined from the profile graph for each radial. This may be obtained by averaging a large number of equally spaced points, by using a planimeter, or by obtaining the median elevation (that exceeded for 50% of the distance) in sectors and averaging these values.

To determine the distance to a particular contour Figure 1 concerning the range of FM broadcast stations should be used. This chart has been prepared for a frequency in the center of the band and is to be used for all FM broadcast channels, since little change results over this frequency range. The distance to a contour is determined by the effective radiated power and the antenna height. The height of the antenna used in connection with Figure 1 should be the height of the center of the proposed antenna radiator above the average elevation obtained by the preceding method. The distances shown by Figure 1 are based upon an effective radiated power of one kilowatt; to use the chart for other powers, the sliding scale associated with the chart should be trimmed and used as the ordinate scale. This sliding scale is placed on the chart with the appropriate gradation for power in line with the lower line of the top edge of the chart. The right edge of the scale is placed in line with the appropriate antenna height graduations and the chart then becomes direct reading for this power and antenna height. Where the antenna height is not one of those for which a scale is provided, the signal strength or distance is determined by interpolation between the curves connecting the equidistant points.

The foregoing process of determining the extent of the required contours shall be followed in determining the boundary of the proposed service area. The areas within the required contours must be

determined and submitted with each application for these classes of FM broadcast stations. Each application shall include a map showing these contours, and for this purpose Sectional Aeronautical charts or other maps having a convenient scale may be used. The map shall show the radials along which the profile charts and expected field strengths have been determined. The area within each contour should then be measured (by planimeter or other approximate means) to determine the number of square miles therein. In computing the area within the contours, exclude (1) areas beyond the borders of the United States, and (2) large bodies of water, such as ocean areas, gulfs, sounds, bays, large lakes, etc., but not rivers.

In cases where the terrain in one or more directions from the antenna site departs widely from the average elevation of the two to ten mile sector, the application of this prediction method may indicate contour distances that are different from those which may be expected in practice. In such cases the prediction method should be followed, but a showing may be made if desired concerning the distance to the contour as determined by other means. Such showing should include data concerning the procedure employed and sample calculations. For example, a mountain ridge may indicate the practical limit of service although the prediction method may indicate the contour elsewhere. In cases of such limitation, the map of predicted coverage should show both the regular predicted area and the area as limited or extended by terrain. Both areas should be measured, as previously described; the area obtained by the regular prediction method should be given in the application form, with a supplementary note giving the limited or extended area. In special cases the Commission may require additional information as to the terrain in the proposed service area.

In determining the population served by FM broadcast stations, it is considered that the built-up city areas and business districts in cities having over 10,000 population and located beyond the 1,000 uv/m contour do not receive adequate service. Minor Civil Division maps (1940 Census) should be used in making population counts, excluding cities not receiving adequate service. Where a contour divides a minor division, uniform distribution of population within the division should be assumed in order to determine the population included within the contour, unless a more accurate count is available.

SEC. 3. Topographical data. In the preparation of the profile graphs previously described, the elevations or contour intervals shall be taken from the U. S. Geological Topographical Quadrangle Sheets for all areas for which such maps are available. If such maps are not published for the area in question, the next best topographic information should be used. Topographic data may sometimes be obtained from state and municipal agencies. The data from the Sectional Aeronautical Charts (in-

cluding bench marks), or railroad depot elevations and highway elevations from road maps, may be used where no better information is available. In cases where limited topographic data can be obtained, use may be made of an altimeter in a car driven along roads extending generally radially from the transmitter site.

The Commission will not ordinarily require the submission of topographical maps for areas beyond 15 miles from the antenna site, but the maps must include the principal city or cities to be served. If it appears necessary, additional data may be requested.

The U. S. Geological Survey Topography Quadrangle Sheets may be obtained from the U. S. Geological Survey, Department of the Interior, Washington, D. C., for ten cents each. The Sectional Aeronautical Charts are available from the U. S. Coast and Geodetic Survey, Department of Commerce, Washington, D. C., for twenty-five cents each. Other sources of topographic maps or data will be furnished at a later date.

SEC. 4. Interference standards. Field intensity measurements are preferable in predicting interference between FM broadcast stations and should be used, when available, in determining the extent of interference. (For methods and procedure, see section 5). In lieu of measurements, the interference should be predicted in accordance with the method described herein.

Objectionable interference is considered to exist when the interfering signal exceeds that given by the ratios of Table II. In Table II the desired signal is median field and the undesired signal is the tropospheric signal intensity exceeded for 1% of the time.

TABLE II

Channel separation:	Ratio of desired to undesired signals
Same channel	10 : 1
Adjacent channel (200 kc removed)	2 : 1

Objectionable interference is not considered to exist when the channel separation is 400 kc or greater. Accordingly, FM broadcast stations in the same city or same area may be assigned channels 400 kc apart. In the assignment of FM broadcast facilities the Commission will endeavor to provide the optimum use of the channels in the band, and accordingly may assign a channel different than that requested in an application.

In predicting the extent of interference within the ground wave service area of a station, the tropospheric signal intensity (from co-channel and adjacent channel stations) existing for one percent of the time shall be employed. The one percent values for one kilowatt of power and various antenna heights are given in Figure 2, and values for other powers may be obtained by use of the sliding scale as for Figure 1. The values indicated by Figure 2 are based upon available data, and are subject to change as additional information concerning tropospheric wave propagation is obtained.²

² Figure 2 expected to be available approximately November 1, 1945.

In determining the points at which the interference ratio is equal to the values shown in Table II, the field intensities for the two interfering signals under consideration should be computed for a considerable number of points along the line between the two stations. Using this data, field intensity versus distance curves should be plotted (e. g., cross-curves on graph paper) in order to determine the points on this path where the interference ratios exist. The points established by this method, together with the points along the contours where the same ratios are determined, are considered to be generally sufficient to predict the area of interference. Additional points may be required in the case of irregular terrain or the use of directional antenna systems.

The area of interference, if any, shall be shown in connection with the map of predicted coverage required by the application form, together with the basic data employed in computing such interference. The map shall show the interference within the 50 uv/contour.

SEC. 5. Field intensity measurements in allocation. When field intensity measurements are required by the Commission's rules or when employed in determining the extent of service or interference of existing stations, such measurements should be made in accordance with the procedure outlined herein.

Measurements made to determine the service and interference areas of FM broadcast stations should be made with mobile equipment along roads which are as close and similar as possible to the radials showing topography which were submitted with the application for construction permit. Suitable measuring equipment and a continuous recording device must be employed, the chart of which is either directly driven from the speedometer of the automobile in which the equipment is mounted or so arranged that distances and identifying landmarks may be readily noted. The measuring equipment must be calibrated against recognized standards of field intensity and so constructed that it will maintain an acceptable accuracy of measurement while in motion or when stationary. The equipment should be so operated that the recorder chart can be calibrated directly in field intensity in order to facilitate analysis of the chart. The receiving antenna must be non-directional and of the same polarization as the transmitting antenna.

Mobile measurements should be made with a minimum chart speed of 3 inches per mile and preferably 5 or 6 inches per mile. Locations shall be noted on the recorder chart as frequently as necessary to definitely fix the relation between the measured field intensity and the location. The time constant of the equipment should be such to permit adequate analysis of the charts, and the time constant employed shall be shown. Measurements should be made to a point on each radial well beyond the particular contour under investigation. The transmitter power shall be maintained

as close as possible to the authorized power throughout the survey.

After the measurements are completed, the recorder chart shall be divided into not less than 15 sections on each equivalent radial from the station. The field intensity in each section of the chart shall be analyzed to determine the field intensity received 50 percent of the distance (median field) throughout the section, and this median field intensity associated with the corresponding sector of the radial. The field intensity figures must be corrected for a receiving antenna elevation of thirty feet and for any directional effects of the automobile not otherwise compensated. This data should be plotted for each radial, using log-log coordinate paper with distance as the abscissa and field intensity as the ordinate. A smooth curve should be drawn through these points (of median fields for all sectors), and this curve used to determine the distance to the desired contour. The distances obtained for each radial may then be plotted on the map of predicted coverage or on polar coordinate paper (excluding water areas, etc.) to determine the service and interference areas of a station.

In making measurements to establish the field intensity contours of a station, mobile recordings should be made along each of the radials drawn in section 2 E above. Measurements should extend from the vicinity of the station out to the 1000 uv/m measured contour and somewhat beyond (at the present time it is not considered practical to conduct mobile measurements far beyond this contour due to the fading ratio at weak fields, which complicates analysis of the charts). These measurements would be made for the purpose of determining the variation of the measured contours from those predicted, and it is expected that initially the correlation of the measured 1000 uv/m with the predicted 1000 uv/m contour will be used as a basis in determining adherence to authorized service areas within the 50 uv/m contour. Adjustment of power or antenna may be required to fit the actual contours to that predicted.

In addition to the 1000 uv/m contour, the map of measured coverage shall show the 50 uv/m contour as determined by employing Figure 1 and the distance to the 1000 uv/m contour along each radial. The sliding scale shall be placed on the figure at the appropriate antenna height for the radial in question and then moved so the distance to the 1000 uv/m contour (as measured) and the 1000 uv/m mark are opposite. The distance to the 50 uv/m contour is then given opposite the 50 uv/m mark on the scale.

In predicting tropospheric interference on the basis of the above measurements, such measurements shall be carried out in the manner indicated above to determine the 1000 uv/m contour. Using Figure 1 and its associated sliding scale, the equivalent radiated power shall be determined by placing the sliding scale on the chart (using the appropriate antenna height) and moving the scale until the distance to the 1000 uv/m contour (as determined above), and the 1000 uv/m

mark are opposite. The equivalent radiated power is then read from the sliding scale where it crosses the lower line of the top edge of the chart. Changing to Figure 2 and using the equivalent radiated power just determined, the distance to the interfering contour under investigation is read in the usual manner.

In certain cases the Commission may desire more information or recordings and in these instances special instructions will be issued. This may include fixed location measurements to determine tropospheric propagation and fading ratios.

Complete data taken in conjunction with field intensity measurements shall be submitted to the Commission in affidavit form, including the following:

A. Map or maps showing the roads or points where measurements were made, the service and/or interference areas determined by the prediction method and by the measurements, and any unusual terrain characteristics existing in these areas. (This map may preferably be of a type showing topography in the area).

B. If a directional transmitting antenna is employed, a diagram on polar coordinate paper showing the predicted free space field intensity in millivolts per meter at one mile in all directions. (See section 7).

C. A full description of the procedures and methods employed including the type of equipment, the method of installation and operation, and calibration procedures.

D. Complete data obtained during the survey, including calibration.

E. Antenna system and power employed during the survey.

F. Name, address, and qualifications of the engineer or engineers making the measurements.

All data shall be submitted to the Commission in triplicate, except that only the original or one photostatic copy need be submitted of the actual recording tapes.

SEC. 6. Transmitter location. A. The transmitter location should be as near the center of the proposed service area as possible consistent with the applicant's ability to find a site with sufficient elevation to provide service throughout the area. Location of the antenna at a point of high elevation is necessary to reduce to a minimum the shadow effect on propagation due to hills and buildings which may reduce materially the intensity of the station's signals in a particular direction. The transmitting site should be selected consistent with the purpose of the station, i. e., whether it is intended to serve a small city, a metropolitan area, or a large region. Inasmuch as service may be provided by signals of 1000 uv/m or greater field intensities in metropolitan areas, and inasmuch as signals as low as 20 uv/m may provide service in rural areas, considerable latitude in the geographical location of the transmitter is permitted; however, the necessity for a high elevation for the antenna may render this problem difficult. In general, the transmitting antenna of a station should be located at the most central point at the highest elevation available. In providing the best degree of service to an area, it is usually preferable to use a high

antenna rather than a lower antenna with increased transmitter power. The location should be so chosen that line-of-sight can be obtained from the antenna over the principal city or cities to be served; in no event should there be a major obstruction in this path.

B. The transmitting location should be selected so that the 1000 uv/m contour encompasses the urban population within the area to be served and the 50 uv/m or the interference free contour coincides generally with the limits of the area to be served. It is recognized that topography, shape of the desired service area, and population distribution may make the choice of a transmitter location difficult. In such cases consideration may be given to the use of a directional antenna system, although it is generally preferable to choose a site where a non-directional antenna may be employed.

C. In cases of questionable antenna locations it is desirable to conduct propagation tests to indicate the field intensity expected in the principal city or cities to be served and in other areas, particularly where severe shadow problems may be expected. In considering applications proposing the use of such locations, the Commission may require site tests to be made. Such tests should be made in accordance with the measurement procedure previously described, and full data thereon must be supplied to the Commission. Test transmitters should employ an antenna having a height as close as possible to the proposed antenna height, using a balloon or other support if necessary and feasible. Information concerning the authorization of site tests may be obtained from the Commission upon request.

D. Present information is not sufficiently complete to establish "blanket areas" of FM broadcast stations, which are defined as those areas adjacent to the transmitters in which the reception of other stations is subject to interference due to the strong signal from the stations. Where it is found necessary to locate the transmitter in a residential area where blanketing problems may appear to be excessive, the application must include a showing concerning the availability of other sites. The authorization of station construction in areas where blanketing problems appear to be excessive will be on the basis that the applicant will assume full responsibility for the adjustment of reasonable complaints arising from excessively strong signals of the applicant's station. As a means of minimizing interference problems, it is expected that stations adjacent in location will generally be assigned frequencies that are generally adjacent. Insofar as is feasible, frequency assignments for stations at separated locations will also be separated.

Cognizance must of course be taken regarding the possible hazard of the proposed antenna structure to aviation and the proximity of the proposed site to airports and airways. In passing on proposed construction, the Commission refers each case to the CAA for its recommendations. Antenna painting and/or lighting may be required at the time of construction or at a later date.

SEC. 7. *Antenna systems.* A. It shall be standard to employ horizontal polarization. If the use of vertical polarization appears desirable in special circumstances, its use may be authorized upon a showing of need.

B. The antenna must be constructed so that it is as clear as possible of surrounding buildings or objects that would cause shadow problems.

C. Applications proposing the use of directional antenna systems must be accompanied by the following:

(1) Complete description of the proposed antenna system.

(2) Orientation of array with respect to true north; time phasing of fields from elements (degrees leading or lagging); space phasing of elements (in feet and in degrees); ratio of fields from elements.

(3) Calculated field intensity pattern (on letter-size polar coordinate paper) giving the free space field intensity in millivolts per meter at one mile in the horizontal plane, together with the formula used, constants employed, sample calculations and tabulation of calculation data.

(4) Name, address, and qualifications of the engineer making the calculations.

D. Applications proposing the use of FM broadcast antennas in the immediate vicinity (i. e., 200 feet or less) of (1) other FM broadcast antennas, or (2) television broadcast antennas for frequencies adjacent to the FM broadcast band, must include a showing as to the expected effect, if any, of such proximate operation.

In cases where it is proposed to use a tower of a standard broadcast station as a supporting structure for an FM broadcast antenna, an application for construction permit (or modification of construction permit) for such station must be filed for consideration with the FM application. Applications may be required for other classes of stations when their towers are to be used in connection with FM broadcast stations.

When an FM broadcast antenna is mounted on a non-directional standard broadcast antenna, new resistance measurements must be made of the standard broadcast antenna after installation and testing of the FM broadcast antenna. During the installation and until the new resistance determination is approved, the standard broadcast station licensee should apply for authority (informal application) to operate by the indirect method of power determination. The FM broadcast license application will not be considered until the application form concerning resistance measurements is filed for the standard broadcast station.

When an FM broadcast antenna is mounted on an element of a standard broadcast directional antenna, a full engineering study concerning the effect of the FM broadcast antenna on the directional pattern must be filed with the application concerning the standard broadcast station. Depending upon the individual case, the Commission may require readjustment and certain field intensity measurements of the standard broadcast station following the completion of the FM broadcast antenna system.

When the proposed FM broadcast antenna is to be mounted on a tower in the vicinity of a standard broadcast directional array and it appears that the operation of the directional antenna system may be affected, an engineering study must be filed with the FM broadcast application concerning the effect of the FM broadcast antenna on the directional pattern. Readjustment and field intensity measurements of the standard broadcast station may be required following construction of the FM broadcast antenna.

Information regarding data required in connection with standard broadcast directional antenna systems may be found in the Standards of Good Engineering Practice Concerning Standard Broadcast Stations.

In the event a common tower is used by two or more licensees for antenna and/or antenna supporting purposes, the licensee who is owner of the tower shall assume full responsibility for the installation and maintenance of any painting or lighting requirements. In the event of shared ownership, one licensee shall assume such responsibility and advise the Commission accordingly.

E. It is recommended that an emergency FM broadcast antenna be installed, or, alternately, an auxiliary transmission line or lines if feasible in the particular circumstances. Data thereon should be supplied with the application for construction permit; if proposed after station construction, an informal application should be submitted to the Commission.

When necessary for the protection of air navigation, the antenna and supporting structure shall be painted and illuminated in accordance with the specifications supplied by the Commission pursuant to section 303 (q) of the Communications Act of 1934, as amended.

These individual specifications are issued for and attached to each authorization for an installation. The details of the specifications depend on the degree of hazard presented by the particular installation. The tower paint shall be kept in good condition and repainted as often as necessary to maintain this condition.

General information regarding painting and lighting requirements is contained in the Obstruction Marking Manual available from the Civil Aeronautics Administration, Washington 25, D. C.

SEC. 8. *Transmitters and associated equipment—A. Electrical Performance Standards.* The general design of the FM broadcast transmitting system (from input terminals of microphone pre-amplifier, through audio facilities at the studio, through lines or other circuits between studio and transmitter, through audio facilities at the transmitter, and through the transmitter, but excluding equalizers for the correction of deficiencies in microphone response) shall be in accordance with the following principles and specifications:

(1) Standard power ratings and operating power range of FM broadcast transmitters shall be in accordance with the following table:

Standard power rating:	Operating power range
250 watts.....	250 watts or less.
1 kw.....	250 watts-1 kw.
3 kw.....	1-3 kw.
10 kw.....	3-10 kw.
25 kw.....	10-25 kw.
50 kw.....	10-50 kw.
100 kw.....	50-100 kw.

Composite transmitters may be authorized with a power rating different from the above table, provided full data is supplied in the application concerning the basis employed in establishing the rating and the need therefor. The operating range of such transmitters shall be from one-third of the power rating to the power rating.

The transmitter shall operate satisfactorily in the operating power range with a frequency swing of ± 75 kilocycles, which is defined as 100% modulation.

(2) The transmitting system shall be capable of transmitting a band of frequencies from 50 to 15,000 cycles. Pre-emphasis shall be employed in accordance with the impedance-frequency characteristic of a series inductance-resistance network having a time constant of 75 microseconds. (See Figure 3). The deviation of the system response from the standard pre-emphasis curve shall lie between two limits as shown in Figure 3. The upper of these limits shall be uniform (no deviation) from 50 to 15,000 cycles. The lower limit shall be uniform from 100 to 7500 cycles, and three db below the upper limit; from 100 to 50 cycles the lower limit shall fall from the three db limit at a uniform rate of one db per octave (four db at 50 cycles); from 7500 to 15,000 cycles the lower limit shall fall from the three db limit at a uniform rate of two db per octave (five db at 15,000 cycles).

(3) At any modulation frequency between 50 and 15,000 cycles and at modulation percentages of 25%, 50%, and 100%, the combined audio frequency harmonics measured in the output of the system shall not exceed the root-mean-square values given in the following table:

Modulating frequency:	Distortion (percent)
50 to 100 cycles.....	3.5
100 to 7500 cycles.....	2.5
7500 to 15000 cycles.....	3.0

Measurements shall be made employing 75 microsecond de-emphasis in the measuring equipment and 75 microsecond pre-emphasis in the transmitting equipment, and without compression if a compression amplifier is employed. Harmonics shall be included to 30 kc.³

It is recommended that none of the three main divisions of the system (transmitter, studio to transmitter circuit, and audio facilities) contribute over one half of these percentages since at some frequencies the total distortion may become the arithmetic sum of the distortions of the divisions.

(4) The transmitting system output noise level (frequency modulation) in the band of 50 to 15,000 cycles shall be at least 60 decibels below the audio frequency level representing a frequency

swing of ± 75 kilocycles. The noise-measuring equipment shall be provided with standard 75-microsecond de-emphasis; the ballistic characteristics of the instrument shall be similar to those of the Standard VU Meter.

(5) The transmitting system output noise level (amplitude modulation) in the band of 50 to 15,000 cycles shall be at least 50 decibels below the level representing 100% amplitude modulation.

The noise-measuring equipment shall be provided with standard 75-microsecond de-emphasis; the ballistic characteristics of the instrument shall be similar to those of the Standard VU Meter.

(6) Automatic means shall be provided in the transmitter to maintain the assigned center frequency within the allowable tolerance (± 2000 cycles).

(7) The transmitter shall be equipped with suitable indicating instruments for the determination of operating power and with other instruments as are necessary for proper adjustment, operation, and maintenance of the equipment (See section 9).

(8) Adequate provision shall be made for varying the transmitter output power to compensate for excessive variations in line voltage or for other factors affecting the output power.

(9) Adequate provision shall be provided in all component parts to avoid overheating at the rated maximum output power.

(10) Means should be provided for connection and continuous operation of approved frequency and modulation monitors.

(11) If a limiting or compression amplifier is employed, precaution should be maintained in its connection in the circuit due to the use of pre-emphasis in the transmitting system.

B. Construction. In general, the transmitter shall be constructed either on racks and panels or in totally enclosed frames protected as required by article 810⁴ of the National Electrical Code and set forth below:

(1) Means shall be provided for making all tuning adjustments, requiring voltages in excess of 350 volts to be applied to the circuit, from the front of the panels with all access doors closed.

(2) Proper bleeder resistors or other automatic means shall be installed across all capacitor banks to lower any voltage which may remain accessible with ac-

⁴ The pertinent sections of article 810 of the National Electrical Code read as follows:

"8191. General.—Transmitters shall comply with the following:

"a. Enclosing.—The transmitter shall be enclosed in a metal frame or grille, or separated from the operating space by a barrier or other equivalent means, all metallic parts of which are effectually connected to ground.

"b. Grounding of controls.—All external metallic handles and controls accessible to the operating personnel shall be effectually grounded. No circuit in excess of 150 volts shall have any parts exposed to direct contact. A complete dead-front type of switchboard is preferred.

"c. Interlocks on doors.—All access doors shall be provided with interlocks which will disconnect all voltages in excess of 350 volts when any access door is opened."

cess door open to less than 350 volts within two seconds after the access door is opened.

(3) All plate supply and other high voltage equipment, including transformers, filters, rectifiers and motor generators, shall be protected so as to prevent injury to operating personnel.

(a) Commutator guards shall be provided on all high voltage rotating machinery. Coupling guards should be provided on motor generators.

(b) Power equipment and control panels of the transmitter shall meet the above requirements (exposed 220 volt AC switching equipment on the front of the power control panels is not recommended but is not prohibited.)

(c) Power equipment located at a broadcast station but not directly associated with the transmitter (not purchased as part of same), such as power distribution panels, are not under the jurisdiction of the Commission; therefore § 3.254 does not apply.

(4) **Metering equipment.** (a) All instruments having more than 1,000 volts potential to ground on the movement shall be protected by a cage or cover in addition to the regular case. (Some instruments are designed by the manufacturer to operate safely with voltages in excess of 1,000 volts on the movement. If it can be shown by the manufacturer's rating that the instrument will operate safely at the applied potential, additional protection is not necessary.)

(b) In case the plate voltmeter is located on the low potential side of the multiplier resistor with the potential of the high potential terminal of the instrument at or less than 1,000 volts above ground, no protective case is required. However, it is good practice to protect voltmeters subject to more than 5,000 volts with suitable overvoltage protective devices across the instrument terminals in case the winding opens.

(c) Transmission line meters and any other radio frequency instrument which may be necessary for the operator to read shall be so installed as to be easily and accurately read without the operator having to risk contact with circuits carrying high potential radio frequency energy.

(5) It is recommended that component parts comply as much as possible with the component specifications designated by the Army-Navy Electronics Standards Agency.

C. Wiring and shielding. (1) The transmitter panels or units shall be wired in accordance with standard switchboard practice, either with insulated leads properly cabled and supported or with rigid bus bar properly insulated and protected.

(2) Wiring between units of the transmitter, with the exception of circuits carrying radio frequency energy, shall be installed in conduits or approved fiber or metal raceways for protection from mechanical injury.

(3) Circuits carrying radio frequency energy between units shall be coaxial, two wire balanced lines, or properly shielded.

³ See section 13 for measurement frequencies and other information.

(4) All stages or units shall be adequately shielded and filtered to prevent interaction and radiation.

(5) The frequency and modulation monitors and associated radio frequency lines to the transmitter shall be thoroughly shielded.

D. *Installation.* (1) The installation shall be made in suitable quarters.

(2) Since an operator must be on duty during operation, suitable facilities for his welfare and comfort shall be provided.

E. *Spare tubes.* A spare tube of every type employed in the transmitter and frequency and modulation monitors shall be kept on hand at the equipment location. When more than one tube of any type are employed, the following table determines the number of spares of that type required:

Number of each type employed:	Spares required
1 or 2.....	1
3 to 5.....	2
6 to 8.....	3
9 or more.....	4

An accurate circuit diagram and list of required spare tubes, as furnished by the manufacturer of the equipment, shall be retained at the transmitter location.

F. *Operation.* In addition to specific requirements of the rules governing FM broadcast stations, the following operating requirements are specified:

(1) The maximum percentage of modulation shall be maintained in accordance with § 3.268. However precautions shall be taken so as not to substantially alter the dynamic characteristics of musical programs.

(2) Spurious emissions, including radio frequency harmonics, shall be maintained at as low a level as practicable at all times in accordance with good engineering practice.

(3) If a limiting or compression amplifier is employed, care should be maintained in its use due to pre-emphasis in the transmitting system.

G. *Studio equipment.* Studio equipment shall be subject to all the above requirements where applicable except as follows:

(1) If properly covered by an underwriter's certificate, it will be considered as satisfying safety requirements.

(2) Section 8191 of Article 810 of the National Electrical Code shall apply for voltages only in excess of 500 volts.

No specific requirements are made with regards to the microphones to be employed. However, microphone performance (including compensating networks, if employed) shall be compatible with the required performance of the transmitting system.

No specific requirements are made relative to the design and acoustical treatment of studios. However, the design of studios, particularly the main studio, shall be compatible with the required performance characteristics of FM broadcast stations.

SEC. 9. *Indicating instruments.* An FM broadcast transmitter shall be equipped with suitable indicating instruments of acceptable accuracy to measure (1) the direct plate voltage and current of the last radio stage, and (2) the main

transmission line radio frequency current or voltage.

The following requirements and specifications shall apply to indicating instruments used by FM broadcast stations:

A. Instruments indicating the plate current or plate voltage of the last radio stage (linear scale instruments) shall meet the following specifications:

(1) Length of scale shall be not less than 2 3/10 inches.

(2) Accuracy shall be at least 2 percent of the full scale reading.

(3) Scale shall have at least 40 divisions.

(4) Full scale reading shall not be greater than five times the minimum normal indication.

B. Instruments indicating transmission line current or voltage shall meet the following specifications:

(1) Instruments having linear scales shall meet the requirements of A (1), (2), (3), and (4) above.

(2) Instruments having logarithmic or square law scales

(a) Shall meet requirements A (1) and (2) for linear scale instruments.

(b) Full scale reading shall not be greater than three times the minimum normal indication.

(c) No scale division above one-third full scale reading (in amperes) shall be greater than one-thirtieth of the full scale reading.

C. Radio frequency instruments having expanded scales:

(1) Shall meet requirements A (1), (2), and (4) for linear scale instruments.

(2) No scale division above one-fifth full scale reading (in amperes) shall be greater than one-fiftieth of the full scale reading.

(3) The meter face shall be marked with the words "Expanded Scale" of the abbreviation thereof (E. S.).

D. No instruments indicating the plate current or plate voltage of the last radio stage or the transmission line current or voltage shall be changed or replaced without written authority of the Commission, except by instruments of the same maximum scale readings and accuracy. Requests for authority to use an instrument of different maximum scale reading and/or accuracy shall be made by letter or telegram giving the manufacturer's name, type number, and full scale reading of the proposed instrument and the values of current or voltage the instrument will be employed to indicate. Requests for temporary authority to operate without an instrument may be made by letter or telegram stating the necessity therefor and the period involved.

E. No required instrument, the accuracy of which is questionable, shall be employed. Repairs and recalibration of instruments shall be made by the manufacturer, or by an authorized instrument repair service of the manufacturer, or by some other properly qualified and equipped instrument repair service. In any event the repaired instrument must be supplied with a certificate of calibration.

F. Recording instruments may be employed in addition to the indicating instruments to record the transmission line

current or voltage and the direct plate current and/or direct plate voltage of the last radio stage, provided that they do not affect the operation of the circuits or accuracy of the indicating instruments. If the records are to be used in any proceeding before the Commission as representative of operation, the accuracy must be the equivalent of the indicating instruments and the calibration shall be checked at such intervals as to insure the retention of the accuracy.

G. The function of each instrument used in the equipment shall be clearly and permanently shown on the instrument itself or on the panel immediately adjacent thereto.

SEC. 10. *Auxiliary transmitters.* Auxiliary transmitters may not exceed the power rating or operating power range of the main transmitter, but need not conform to the performance characteristics specified by section 8 A (2) to 8 A (5) inclusive. The subsequent portions of section 8 apply to auxiliary transmitters.

SEC. 11. *Operating power; determination and maintenance.* A. The operating power of FM broadcast stations shall be determined by the indirect method. This is the product of the plate voltage (E_p) and the plate current (I_p) of the last radio stage, and an efficiency factor, F ; that is:

$$\text{Operating power} = E_p \times I_p \times F$$

The efficiency factor, F , shall be established by the transmitter manufacturer for each type of transmitter for which he requests FCC approval, and shall be shown in the instruction books supplied to the customer with each transmitter. In the case of composite equipment the factor F shall be furnished to the Commission by the applicant along with a statement of the basis used in determining such factor.

B. The operating power shall be maintained as near as practicable to the authorized operating power, and shall not exceed the limits of 5 percent above and 10 percent below the authorized power except in emergencies. In the event it becomes impossible to operate with the authorized power, the station may be operated with reduced power for a period of 10 days or less provided the Commission and the Inspector in Charge of the district in which the station is located shall be notified in writing immediately thereafter and also upon the resumption of normal operating power.

SEC. 12. *Frequency and modulation monitors at auxiliary transmitters.* Sections 3.252 and 3.253 require that each FM broadcast station have approved frequency and modulation monitors in operation at the transmitter. The following shall govern the installation of approved frequency and modulation monitors at auxiliary transmitters of FM broadcast stations in compliance with these rules:

In case the auxiliary transmitter location is at a site different from that of

* See Appendix 3 of Part I of the rules and regulations for addresses of Field Offices.

the main transmitter, an approved frequency monitor shall be installed at the auxiliary transmitter except when the frequency of the auxiliary transmitter can be monitored by means of the frequency monitor at the main transmitter. When the auxiliary transmitter is operated without a frequency monitor under this exemption, it shall be monitored by means of the frequency monitor at the main transmitter.

The licensee will be held strictly responsible for any center frequency deviation of the auxiliary transmitter in excess of 2000 cycles from the assigned frequency, even though exempted by the above from installing an approved frequency monitor.

Installation of an approved modulation monitor at the location of the auxiliary transmitter, when different from that of the main transmitter, is optional with the licensee. However, when it is necessary to operate the auxiliary transmitter beyond two calendar days, a modulation monitor shall be installed and operated at the auxiliary transmitter. The monitor (if taken from the main transmitter) shall be reinstalled at the main transmitter immediately upon resumption of operation of the main transmitter.

In all cases where the auxiliary transmitter and the main transmitter have the same location, the same frequency and modulation monitors may be used for monitoring both transmitters, provided they are so arranged as to be readily switched from one transmitter to the other.

SEC. 13. Requirements for type approval of transmitters. Section 3.254 of the rules and section 8 of these Standards concern the design, construction and technical operation of FM broadcast station equipment. In order to facilitate the filing of and action on applications for construction permits specifying equipment of standard manufacture, the Commission will approve, as complying with the technical requirements, such equipment by type, subject to the following conditions and in accordance with the following procedure:

A. Approval of equipment by the Commission is only to the effect that insofar as can be determined from the data supplied, the equipment complies with the current requirements of good engineering practice and the current technical rules and regulations of the Commission. The approval may be withdrawn upon subsequent inspection or operation showing the equipment is not as represented or does not comply with the technical rules and regulations of the Commission and the requirements of good engineering practice.

B. Such approval shall not be construed to mean that the equipment will be satisfactory as the state of the art progresses and/or as the rules and regulations of the Commission may be changed as deemed advisable.

C. Applicants specifying equipment of approved manufacture need not submit detailed descriptions and diagrams where the correct type number is specified:

Provided, That the equipment proposed is identical with that approved.

D. In passing on equipment, no consideration is given by the Commission to patent rights.

E. For approval of FM broadcast transmitters, manufacturers shall submit FCC Form 319 completed with respect to all pertinent sections (two sworn copies). In addition or included therein shall be the data set forth below, all of which shall be verified before a notary public.⁷

(1) Photographs or drawings, or any other evidence that construction is in accordance with the requirements of good engineering practice.

(2) Data and curves showing over-all audio frequency response from 50 to 15,000 cycles for approximately 25, 50 and 100 percent modulation. Measurements shall be made on at least the following modulation frequencies: 50, 100, 400, 5000, 10,000 and 15,000 cycles. This shall be plotted below a standard 75 microsecond pre-emphasis curve (see Figure 3).

(3) Data on audio frequency harmonics for 25, 50 and 100 percent modulation for the fundamental frequencies of 50, 100, 400, 1000 and 5000 cycles. Data on audio frequency harmonics for 100 percent modulation for fundamental frequencies of 10,000 and 15,000 cycles. Measurements shall include harmonics to 30,000 cycles. (Measurements at 10,000 and 15,000 cycles at 25 and 50 percent modulation are not practical at this time, due to the deemphasis in the measuring equipment.)

(4) Carrier hum and extraneous noise (AM and FM) generated within the equipment and measured as the level below 100 percent modulation.

(5) Means of varying output power to compensate for power supply voltage variations.

(6) Data and curves on mean frequency stability for variations in ambient temperatures over the ranges encountered in practice.

(7) Data and curves on frequency stability for variations in power supply voltage from 85 to 115 percent normal.

(8) Net sale price.

F. In case any manufacturer decides to produce a 100 kw transmitter and submit data on it for approval, or any power rating not listed as standard, he shall give notice to the Commission which will release by public notice the manufacturer's name and the standard power rating of the transmitter to be produced at least six months prior to the delivery date or completion of such transmitter.

SEC. 14. Requirements for type approval of frequency monitors.

Section 3.252 of the rules requires each FM broadcast station to have in operation, at the transmitter, an approved frequency monitor independent of the frequency control of the transmitter. The frequency monitor shall be approved

by the Commission and shall have a stability and accuracy of at least one-half (± 1000 cycles) of the permitted frequency deviation of the FM broadcast station. Visual indication of the operating frequency shall be provided.

A. *General requirements.* In general a frequency monitor for FM broadcast stations requires a stable source of radio frequency energy whose frequency is accurately known and a means of comparing the transmitter center frequency with this stable source. The visual indicator is calibrated to indicate the deviation of the transmitter center frequency from the frequency assigned.

Approval of a frequency monitor for FM broadcast stations will be considered on the basis of data submitted by the manufacturer. Any manufacturer desiring to submit a monitor for approval shall supply the Commission with full details (two sworn copies).

In approving a frequency monitor based on these tests and specifications, the Commission merely recognizes that the type of monitor has the inherent capability of functioning in compliance with § 3.252, if properly constructed, maintained and operated. The Commission accepts no responsibility beyond this and further realizes that monitors may have a limited range over which the visual indicator will determine deviations. Accordingly, it may be necessary that adjunct equipment be used to determine major deviations.

No change whatsoever will be permitted in the monitors sold under approval number issued by the Commission except when the licensee or the manufacturer is specifically authorized to make such changes. When it is desired to make any change, either mechanical or electrical, the details shall be submitted to the Commission for its consideration.

Approval is given subject to withdrawal if the unit proves defective in service and cannot be relied upon under usual conditions of maintenance and operation encountered in the average FM broadcast station. Withdrawal of approval means that no further units may be installed by FM broadcast stations for the purpose of complying with § 3.252; however, this will not affect units already sold unless it is found that there has been an unauthorized change in design or construction or that the material or workmanship is defective.

B. *General specifications.* The general specifications that frequency monitors shall meet before they will be approved by the Commission are as follows:⁷

(1) The unit shall have an accuracy of at least ± 1000 cycles under ordinary conditions (temperature, humidity, power supply variations and other conditions which may affect its accuracy) encountered in FM broadcast stations throughout the United States, for any channel within the FM broadcast band.

(2) The range of the indicating device shall be at least from 2000 cycles below to 2000 cycles above the assigned center frequency.

⁷ In connection with its type approval of FM equipment, the Commission may send a representative to observe tests made of such equipment by the manufacturer.

⁶ Tentative standard.

(3) The scale of the indicating device shall be so calibrated as to be accurately read within at least 100 cycles.

(4) Means shall be provided for adjustment of the monitor indication to agree with an external standard.

(5) The monitor shall be capable of continuous operation and its circuit shall be such as to permit continuous monitoring of the transmitter center frequency.

(6) Operation of the monitor shall have no deleterious effect on the operation of the transmitter or the signal emitted therefrom.

C. Tests to be made for approval of FM broadcast frequency monitors. The manufacturer of a monitor shall submit data on the following at the time of requesting approval:

(1) Constancy of oscillator frequency, as measured several times in one month.

(2) Constancy of oscillator frequency when subjected to vibration tests which would correspond to the treatment received in shipping, handling and installing the instrument.

(3) Accuracy of readings of the frequency deviation instrument.

(4) Functioning of frequency adjustment device.

(5) Effects on frequency and readings, of the changing of tubes, of voltage variations, and of variations of room temperature through a range not to exceed 10° to 40° C.

(6) Response of indicating instrument to small changes of frequency.

(7) General information on the effect of tilting or tipping or other tests to determine ability of equipment to withstand shipment.

Various other tests may be made or required, such as effects of variation of input from the transmitter depending upon the character of the apparatus.

Tests shall be conducted in such a manner as to approximate actual operating conditions as nearly as possible. The equipment under test shall be operated on any channel in the FM broadcast band.

SEC. 15. Requirements for type Approval of Modulation Monitors.⁶ Section 3.253 requires each FM broadcast station to have an approved modulation monitor in operation at the transmitter. This monitor may or may not be a part of the FM broadcast frequency monitor. Approval of a modulation monitor for FM broadcast stations will be considered on the basis of data submitted by the manufacturer. Any manufacturer desiring to submit a monitor for approval shall supply the Commission with full details (two sworn copies).

The specifications that the modulation monitor shall meet before it will be approved by the Commission are as follows:⁷

A. A device for setting the transmitter input to the modulation monitor.

B. A modulation peak indicating device that can be set at any predetermined value from 50 to 120 percent modulation

⁶ Tentative standard.

⁷ In connection with its type approval of FM equipment, the Commission may send a representative to observe tests made of such equipment by the manufacturer.

(± 75 kc swing is defined as 100-percent modulation) and for either positive or negative swings (i. e., either above or below transmitter center frequency).

C. An indicator using a meter having the characteristics and scale of a standard VU meter. A switch shall be provided so this meter will read either positive or negative swings. The accuracy of reading of percentage of modulation shall be within ± 5 percent modulation percentage at any percentage of modulation up to 100 percent modulation.

D. The frequency characteristic curve shall not depart from a straight line more than $\pm \frac{1}{2}$ db from 50 to 15,000 cycles. Distortion shall be kept to a minimum.

E. The monitor shall not absorb appreciable power from the transmitter.

F. Operation of the monitor shall have no deleterious effect on the operation of the transmitter.

G. General design, construction and operation shall be in accordance with good engineering practice.

TITLE 49—TRANSPORTATION AND RAILROADS

Chapter I—Interstate Commerce Commission

[S. O. 357]

PART 95—CAR SERVICE

SUBSTITUTION OF REFRIGERATOR CARS FOR BOX CARS TO TRANSPORT FRUIT AND VEGETABLE CONTAINERS AND BOX SHOOKS

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 16th day of October, A. D. 1945.

It appearing, that fruit and vegetable containers and box shooks are now moving in box cars from Houston, Marshall, Mineola and Paris, Texas, and Ashdown and Hope, Arkansas, to destinations in the Texas-Rio Grande Valley; that refrigerator cars are moving empty from the same points of origin to the same points of destination and that the substitution of refrigerator cars for such box cars will release the box cars for other and more essential transportation; in the opinion of the Commission an emergency exists requiring immediate action to prevent a shortage of equipment; it is ordered, that:

Substitution of refrigerator cars for box cars, to transport fruit and vegetable containers and box shooks. (a) (1) Except as provided in paragraph (a) (2), common carriers by railroad subject to the Interstate Commerce Act transporting fruit and vegetable containers and box shooks in carloads from Houston, Marshall, Mineola and Paris, Texas, and Ashdown and Hope, Arkansas, to destinations in the Texas-Rio Grande Valley, may, at their option, furnish and transport not more than three (3) RS type refrigerator cars with floor racks suitable for loading fruits and vegetables, in lieu of each box car ordered, subject to the carload minimum weight which would have applied if the shipment had been loaded in a box car.

(2) On shipments on which the carload minimum weight varies with the size of the car,

(i) Two (2) RS type refrigerator cars with floor racks suitable for loading fruits and vegetables, may be furnished in lieu of one (1) box car ordered of a length of 40'7", or less, subject to the carload minimum weight which would have applied if the shipment had been loaded in a box car of the size ordered.

(ii) Three (3) RS type refrigerator cars with floor racks suitable for loading fruits and vegetables may be furnished in lieu of one (1) box car ordered of a length of over 40'7", but not over 50'7", subject to the carload minimum weight which would have applied if the

shipment had been loaded in a box car of the size ordered.

(b) *Application.* The provisions of this order shall apply to shipments moving in intrastate commerce as well as to those moving in interstate commerce.

(c) *Expiration date.* This order shall expire at 11:59 p. m., February 20, 1946, unless otherwise modified, changed, suspended or annulled by order of this Commission.

(d) *Conflicting service orders suspended.* The operation of Service Order No. 68 (8 F.R. 8513) of January 30, 1942, as amended (8 F.R. 8513; 8 F.R. 14224, 8 F.R. 16265, 9 F.R. 7206) and all other orders of the Commission insofar as they conflict with the provisions of this order, or as amended, is suspended.

(e) *Tariff provisions suspended.* The operation of all tariff rules and regulations insofar as they conflict with the provisions of this order is hereby suspended.

(f) *Announcement of suspension.* Each of such railroads, or its agent, shall publish, file, and post a supplement to each of its tariffs affected hereby, in substantial accordance with the provisions of Rule 9 (k) of the Commission's Tariff Circular No. 20 (§ 141.9 (k) of this chapter) announcing the suspension of any of the provisions therein. (40 Stat. 101, sec. 402, 41 Stat. 476, sec. 4, 54 Stat. 901; 49 U. S. C. 1 (10)-(17))

It is further ordered, that this order shall become effective at 12:01 a. m., October 24, 1945, and shall remain in force until further order of the Commission; that a copy of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

By the Commission, Division 3.

TRI-STATE MARKETING AREA

NOTICE OF HEARING ON HANDLING OF MILK

Proposed amendments to tentatively approved marketing agreement and order regulating the handling of milk in the Tri-State marketing area.

Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and in accordance with the applicable rules of practice and procedure, as amended (7 CFR Cum. Supp. 900.1 et seq., 10 F.R. 11791), notice is hereby given of a hearing to be held in the Hotel Pritchard, Huntington, West Virginia, beginning at 10 a. m., e. s. t., October 26, 1945, with respect to the proposed amendments to the tentatively approved marketing agreement and order regulating the handling of milk in the Tri-State marketing area. These amendments have not received the approval of the Secretary of Agriculture.

This public hearing is for the purpose of receiving evidence with respect to economic or marketing conditions which relate to the amendments, or any modification thereof, which are hereinafter set forth. The proposed amendments are set forth below.

Amendments proposed by the Scioto County Cooperative Milk Producers' Association, the Huntington Inter-State Milk Producers' Association, the Athens Milk Sales, Inc., and the Marietta Cooperative Milk Producers' Association:

1. Add to § 972.5 (a) the following: "Provided, That such Class I price shall not be less than \$3.90 per hundredweight for 4 percent milk for that portion of the Tri-State marketing area supplied by Huntington district plants, and \$3.70 per hundredweight for 4 percent milk for all other plants under Federal milk marketing order No. 72 for all delivery periods prior to April 1, 1946."

2. Add to § 972.5 (b) the following: "Provided, That such Class II price for milk shall not be less than \$3.60 per hundredweight for milk of 4 percent butterfat content for that portion of the Tri-State marketing area supplied by the Huntington district plants and \$3.40 per hundredweight for milk of 4 percent butterfat content for all other plants under Federal milk marketing order No. 72 for all delivery periods prior to April 1, 1946."

Amendments proposed by the Dairy Branch, Production and Marketing Administration:

1. Add at the end of § 972.7 (a) the following proviso: "Provided further, That if in the verification by the market administrator of reports or payments of such handler for any delivery period the market administrator discovers errors which result in payments due the producer-settlement fund or the handler, there shall be added or subtracted, as the case may be, the amount necessary to correct such errors."

2. Add at the end of § 972.7 (d) (1) the following phrase: "including any adjustments of values for any previous delivery period."

3. Delete § 972.7 (d) (4) and substitute therefor the following:

(4) the total amount to be paid to producers and associations of producers by such handler pursuant to § 972.8.

4. Make such other changes as are necessary to make other sections of the order conform to the amendments proposed in this notice of hearing.

Copies of this notice of hearing and of the tentatively approved marketing agreement and order, now in effect, may be procured from the Hearing Clerk, Office of the Solicitor, United States Department of Agriculture, in Room 1331 South Building, Washington, D. C., or may be there inspected.

[Docket No. FDC-43]

SHELLFISH: DEFINITIONS AND STANDARDS
OF IDENTITY, QUALITY, AND FILL OF
CONTAINER; RAW OYSTERS, IDENTITY

NOTICE OF CONTINUED HEARING

Notice is hereby given that the Administrator of the Federal Security Agency has continued the public hearing upon proposals contained in the notice of hearing published in the FEDERAL REGISTER of June 16, 1945 (10 F.R. 7266) relative to the matter of fixing and establishing reasonable definitions and standards of identity for raw shucked oysters, to 10 o'clock in the forenoon of November 27, 1945 in Room 117 of the Federal Office Building, First Avenue and Madison Street, Seattle, State of Washington, and thereafter to 10 o'clock in the forenoon of January 15, 1946 in Room 5440 of the Social Security Building, corner Fourth Street and Independence Avenue, S.W., Washington, D. C., at which times and places the taking of evidence on said proposals will be resumed.

The evidence which was received in this matter at Washington, D. C., on July 17, July 18 and August 14, 1945, together with the evidence to be received hereafter, pursuant to this notice, will constitute the evidence of record at the hearing on which the order of the Administrator will be based.

Edward E. Turkel, heretofore designated as presiding officer to conduct the hearing in the place of the Administrator, will continue to conduct the hearing with full authority to administer oaths and affirmations and do all other things appropriate to the conduct of the hearings.

The hearing will be conducted in accordance with the rules of practice provided therefor (21 CFR Cum. Supp. 2.701 to 2.715).

At the hearing the evidence will be restricted to testimony and exhibits that are relevant and material to the matters contained in the suggested regulations.

Suggested regulations for consideration at the hearing, as set forth in the notice of June 16, 1945 (10 F.R. 7266) and which are subject to adoption, rejection, amendment, modification in whole or in part, as the evidence of record adduced at the hearing may require, are set forth below.

§ 36.0 Raw oysters, shucked oysters; identity. (a) Raw oysters, shucked oysters, are the class of foods each of which is obtained by shucking shell oysters after the shell has been freed from adhering mud, and preparing them in accordance with the procedure prescribed in paragraph (b). The name of each such food is the name specified in the applicable definition and standard of identity prescribed in §§ 36.1 to 36.5, inclusive.

(b) If water, or salt water containing less than ---- percent (to be fixed within the range of 0.5 to 0.75 percent) of salt, is used in any vessel into which the oysters are shucked, the combined volume of oysters and liquid when such oysters are emptied from such vessel, is

not less than four times the volume of such water or such salt water. After emptying from such vessel, the oysters are drained, and washed by blowing or otherwise with water or salt water, or both. If the oysters are blown in water, or in salt water containing less than ---- percent (to be fixed within the range of 0.50 to 0.75 percent) of salt, the total time of blowing is not more than 3 minutes. The total time after delivery by the shucker that the oysters are in contact with water, or salt water containing less than ---- percent salt, including the time of any blowing, the time of any rinsing, and the time of any other contact with water or salt water containing less than ---- percent salt, is not more than 30 minutes. Before packing in the container for shipment or other delivery for consumption, the oysters are thoroughly drained and are packed without added water or salt water.

(c) For the purposes of this section:

(1) "Shell oysters" means live oysters in the shell, which, after removal from their beds, have not been floated or otherwise held under conditions which result in the addition of water.

(2) "Shucking" means the removal of the oysters from their shells in such a manner that the oysters are not mutilated and are reasonably free from pieces of shell.

(3) "Thoroughly drained" means that the wash water or other liquid has been drained from the oysters so that when the oysters are tested promptly after packing by draining a representative sample gallon of oysters on a skimmer for 2 minutes, not more than ---- percent (to be fixed within the range of 2 to 4 percent) by weight or volume of liquid is removed by such draining.

(4) "Freed from adhering mud" means that adhering mud is removed to such an extent that the shucked oysters when washed by blowing or otherwise, as specified in paragraph (b) are sufficiently clean for packing.

§ 36.1 Extra large raw oysters, extra large shucked oysters; identity. (a) Extra large raw oysters, extra large shucked oysters, conform to the definition and standard of identity prescribed for raw oysters by § 36.0, and are of such size that one gallon contains not more than 160 oysters, and a quart of the smallest oysters selected therefrom contains not more than 44 oysters.

(b) An alternate name for extra large raw oysters which belong to the genus *Ostrea gigas* or *Ostrea cucullata* is "Pacific oysters".

§ 36.2 Large raw oysters, large shucked oysters; identity. Large raw oysters, large shucked oysters, conform to the definition and standard of identity prescribed for raw oysters by § 36.0 and are of such size that one gallon contains more than 160 oysters but not more than 210 oysters; a quart of the smallest oysters selected therefrom contains not more than 58 oysters, and a quart of the largest oysters selected therefrom contains more than 36 oysters.

§ 36.3 Medium raw oysters, medium shucked oysters; identity. Medium raw oysters, medium shucked oysters, conform to the definition and standard of

identity prescribed for raw oysters by § 36.0 and are of such size that one gallon contains more than 210 oysters but not more than 270 oysters; a quart of the smallest oysters selected therefrom contains not more than 75 oysters, and a quart of the largest oysters selected therefrom contains more than 46 oysters.

§ 36.4 Small raw oysters, small shucked oysters; identity. Small raw oysters, small shucked oysters, conform to the definition and standard of identity prescribed for raw oysters by § 36.0 and are of such size that one gallon contains more than 270 oysters but not more than 450 oysters; a quart of the smallest oysters selected therefrom contains not more than 124 oysters and a quart of the largest oysters selected therefrom contains more than 61 oysters.

§ 36.5 Very small raw oysters, very small shucked oysters; identity. (a) Very small raw oysters, very small shucked oysters, conform to the definition and standard of identity prescribed for raw oysters by § 36.0 and are of such size that one gallon contains more than 450 oysters, and a quart of the largest oysters selected therefrom contains more than 100 oysters.

(b) An alternate name for very small raw oysters which belong to the genus *Ostrea lurida* is "Olympia oysters".

[MPR 260, Order 1910]

MODESTO JIMENEZ URBINA

AUTHORIZATION OF MAXIMUM PRICES

For the reasons set forth in an opinion accompanying this order, and pursuant to § 1358.102 (b) of Maximum Price Regulation No. 260; It is ordered, That:

(a) Modesto Jimenez Urbina, A. Barcelo Street, Cidra, P. R. (hereinafter called "manufacturer") and wholesalers and retailers may sell, offer to sell or deliver and any person may buy, offer to buy or receive each brand and size or frontmark, and packing of the following domestic cigars at the appropriate maximum list price and maximum retail price set forth below:

Brand	Size or frontmark	Packing	Maximum list price	Maximum retail price
Panetela	5 5/8"	50	Per M \$40	Cents 5
Breva Aroma	4 3/4"	50	48	6
Queen	5 3/4"	50	75	10

(b) The manufacturer and wholesalers shall grant, with respect to their sales of each brand and size or frontmark of domestic cigars for which maximum prices are established by this order, the discounts they customarily granted in March 1942 on their sales of domestic cigars of the same price class to purchasers of the same class, unless a

change therein results in a lower price. Packing differentials charged by the manufacturer or a wholesaler in March 1942 on sales of domestic cigars of the same price class to purchasers of the same class may be charged on corresponding sales of each brand and size or frontmark of cigars priced by this order, but shall not be increased. Packing differentials allowed by the manufacturer or a wholesaler in March 1942 on sales of domestic cigars of the same price class to purchasers of the same class shall be allowed on corresponding sales of each brand and size or frontmark of cigars priced by this order and shall not be reduced. If a brand and size or frontmark of domestic cigars for which maximum prices are established by this order is of a price class not sold by the manufacturer or the particular wholesaler in March 1942, he shall, with respect to his sales thereof, grant the discounts and may charge and shall allow the packing differentials customarily granted, charged or allowed (as the case may be) in March 1942 by his most closely competitive seller of the same class on sales of domestic cigars of the same March 1942 price class to purchasers of the same class.

(c) On or before the first delivery to any purchaser of each brand and size or frontmark of domestic cigars for which maximum prices are established by this order, the manufacturer and every other seller (except a retailer) shall notify the purchaser of the maximum list price and the maximum retail price established by this order for such brand and size or frontmark of domestic cigars. The notice shall conform to and be given in the manner prescribed by § 1358.113 of Maximum Price Regulation No. 260.

(d) Unless the context otherwise requires, appropriate provisions of Maximum Price Regulation No. 260, shall apply to sales for which maximum prices are established by this order.

(e) This order may be revoked or amended by the Price Administrator at any time.

This order shall become effective October 18, 1945.

Issued this 17th day of October 1945.

FOWLER EQUIPMENT CO.

AUTHORIZATION OF MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register and pursuant to section 9 of Maximum Price Regulation No. 591; It is ordered:

(a) The maximum net prices, f. o. b. point of shipment, for sales by any person of the following home freezers manufactured by the Fowler Equipment Company of Aurora, Illinois and as described in the application dated August 23, 1945, which is on file with the Building Materials Price Branch, Office of Price Administration, Washington 25, D. C., shall be:

	On sales to distributors	On sales to dealers	On sales to consumers
"Food bank" home freezer 26 cu. ft., 1/4 hp. condensing unit.....	\$382	\$459	\$704

(b) The maximum net prices established in (a) above may be increased by the following amount to each class of purchaser to cover the cost of crating when crating is actually supplied: \$6.00.

(c) The maximum net prices established by this order shall be subject to discounts and allowances and the rendition of services which are at least as favorable as those which each seller extended or rendered or would have extended or rendered to purchasers of the same class on comparable sales of similar commodities during March 1942.

(d) On sales by a distributor or dealer the following charges may be added to the maximum prices established in (a) above:

(1) The actual amount of freight paid to obtain delivery to his place of business. Such charges shall not exceed the lowest common carrier rates.

(2) Crating charges actually paid to his supplier but in no instance exceeding the amount specified in (b) above.

(e) Each seller covered by this order, except a dealer, shall notify each of his purchasers, in writing, at or before the issuance of the first invoice after the effective date of this order, of the maximum prices established by this order for each such seller as well as the maximum prices established for purchasers upon resale, except retailers, including allowable transportation and crating charges.

(f) The Fowler Equipment Company of Aurora, Illinois shall stencil on the inside of the lid or cover of the home freezer covered by this order, substantially the following:

OPA Maximum Retail Price—\$764

Plus freight and crating as provided in Order No. 51 under Maximum Price Regulation No. 591.

(g) This order may be revoked or amended by the Price Administrator at any time.

This order shall become effective October 18, 1945.

Issued this 17th day of October 1945.

ATHERTON-ADAMS MINING CO. ET AL.

ESTABLISHMENT OF MAXIMUM PRICES AND PRICE CLASSIFICATIONS

For the reasons set forth in an accompanying opinion, and in accordance with § 1340.210 (a) (6) of Maximum Price Regulation No. 120; It is ordered:

Producers identified herein operate named mines assigned the mine index numbers, the price classifications and the maximum prices in cents per net ton, for the indicated uses and shipments as set forth herein. All are in District No. 3. The mine index numbers and the price classifications assigned are permanent but the maximum prices may be changed by an amendment issued after the effective date of this order. Where such an amendment is issued for the district in

which the mines involved herein are located and where the amendment makes no particular reference to a mine or mines involved herein, the prices shall be the prices set forth in such amendment for the price classifications of the respective size groups. The location of each mine is given by county and state. The maximum prices stated to be for truck shipment are in cents per net ton f. o. b. the mine or preparation plant and when stated to be for rail shipment or for railroad fuel are in cents per net ton f. o. b. rail shipping point. In cases where mines ship coals by river the prices for such shipments are those established for rail shipment and are in cents per net ton f. o. b. river shipping point. However, producer is subject to the provisions of § 1340.214 and all other provisions of Maximum Price Regulation No. 120.

No. 188 became applicable to those sales and deliveries.

(3) For sales by persons other than the manufacturer, the maximum prices apply to all sales and deliveries after the effective date of this order. Those prices are subject to each seller's customary terms and conditions of sale on sales of similar articles.

(4) If the manufacturer wishes to make sales and deliveries to any other class of purchaser or on other terms and conditions of sale, he must apply to the Office of Price Administration, Washington, D. C., under the Fourth Pricing Method, § 1499.158 of Maximum Price Regulation No. 188, for the establishment of maximum prices for those sales, and no sales or deliveries may be made until maximum prices have been authorized by the Office of Price Administration.

(b) The manufacturer shall attach a tag or label to every article for which a maximum price for sales to consumers is established by this order. That tag or label shall contain the following statement:

This Article Manufactured by Boetsch Bros.,
New York, New York
Model No. -----
OPA Retail Ceiling Price—\$-----
Including Federal Excise Tax
Do Not Detach

(c) At the time of, or prior to, the first invoice to each purchaser for resale, the seller shall notify the purchaser in writing of the maximum prices and conditions established by this order for sales by the purchaser. This notice may be given in any convenient form.

(d) This order may be revoked or amended by the Price Administrator at any time.

(e) This order shall become effective on the 17th day of October 1945.

Issued this 16th day of October 1945.

BLADE MASTER, INC.

APPROVAL OF MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to § 1499.158 of Maximum Price Regulation No. 188 and paragraph (a) (16) of Order A-2 under § 1499.159b of Maximum Price Regulation No. 188, *It is ordered:*

(a) This order establishes and adjusts maximum prices for sales and deliveries of a patented mechanical double edge razor blade sharpener identified by the name "Blade-Master" manufactured by Blade Master, Incorporated, 175 East 87th Street, New York City, as follows:

(1) For all sales and deliveries by the manufacturer the maximum prices are established and adjusted in the following manner:

Maximum price	Permitted adjustment	Adjusted maximum price
To jobbers: \$0.59 each	\$0.34	\$0.93
To retailers: \$0.75 each	.34	1.09

These adjusted maximum prices are subject to the manufacturer's customary terms and allowances, and the manufacturer shall separately state the maximum price and the amount of the adjustment on all invoices.

(2) For all sales and deliveries by any other person the maximum prices are established and adjusted in the following manner:

	Adjusted maximum prices (each)
To retailers	\$1.15
To consumers:	
East of the Rocky Mountains	1.59
West of the Rocky Mountains	1.65

These adjusted maximum prices are subject to each seller's customary terms, conditions and allowances.

(b) To every mechanical double edge razor blade sharpener, for which maximum prices are established by this order, which is shipped to a purchaser for resale on or after the effective date of this order, the manufacturer shall attach a tag or label containing the following statement:

OPA Retail Ceiling Price
East of the Rocky Mountains—\$1.59 each
West of the Rocky Mountains— 1.65 each

This tag may not be removed before delivery to the consumer.

(c) At the time of, or prior to, the first invoice to a purchaser for resale other than a retailer on and after the effective date of this order, the manufacturer and any other seller shall notify the purchaser in writing of the maximum resale prices and conditions established by this order. This notice may be given in any convenient form.

(d) This order may be revoked or amended by the Price Administrator at any time.

(e) This order shall become effective on the 17th day of October 1945.

Issued this 16th day of October 1945.

JEWEL INCANDESCENT LAMP CO.

ADJUSTMENT OF MAXIMUM PRICES

For the reasons set forth in an opinion, issued simultaneously herewith, and filed with the Division of the Federal Register, and pursuant to paragraph (a) (16) of Order No. A-2 under § 1499.159b of Maximum Price Regulation No. 188, it is ordered:

(a) *Manufacturer's maximum prices.*

(1) Jewel Incandescent Lamp Company, 900 Passaic Avenue, East Newark, New Jersey, may sell and deliver to jobbers and chain stores incandescent lamps of its manufacture at prices no higher than its prices for such sales, in effect immediately prior to the effective date of this order plus the adjustment charges set forth below:

Article	Current maximum price to jobbers and chain stores	Permitted adjustment	Adjusted maximum price to jobbers and chain stores
	<i>Per M</i>		<i>Per M</i>
10 W	\$71.50		\$71.50

300 W (mod. base)	330.00		330.00
300 W (mod. base)	385.00		385.00

These adjusted maximum prices may be charged and collected only if the amounts of the adjustment are specifically stated on each invoice. The adjusted maximum prices are subject to the manufacturer's customary terms, discounts, allowances, and other price differentials in effect during March, 1942, for sales to each class of purchaser.

(2) *Maximum prices for sales by all persons to consumers.* The maximum prices that may be charged on sales by all persons to consumers for these lamps are the maximum prices for such sales in effect immediately prior to the effective date of this order plus the adjustment charges set forth below:

Article	Current maximum price to consumers (per each)	Permitted adjustment (per each)	Adjusted maximum price to consumers (per each)
	<i>Cents</i>	<i>Cents</i>	<i>Cents</i>

300 W (mod. base)	70		70

The adjusted maximum prices are subject to each seller's customary terms, discounts and allowances on sales of the

same or similar articles to each class of purchaser.

(b) *Maximum prices for purchasers at wholesale for resale.* A person who hereafter buys an article covered by this order at wholesale for resale and resells it in substantially the same form, may collect from his customer, in addition to his properly established price in effect prior to the issuance of this order, an adjustment charge in the same amount as the adjustment charge herein authorized for and which he pays to his supplier. If such a purchaser did not have an established price for sales of the article prior to the issuance of this order, he may add the same adjustment charge to the maximum price which he hereafter establishes for his sales under the applicable price regulation.

If the applicable regulation requires maximum resale prices to be computed on the basis of costs, the reseller must find his maximum prices (without permitted adjustment charge) by using as cost his invoice costs not including any adjustment charges stated on the invoice. On all sales, except sales to ultimate consumers, these additional adjustment charges may be made and collected only if they are separately stated on each invoice. The adjusted maximum prices are subject to each seller's customary terms, discounts and allowances on sales of the same or similar articles to each class of purchaser.

(c) *Notification.* At the time of or prior to first invoice to a purchaser for resale on and after the effective date of this order, showing a price adjusted in accordance with the terms of this order, the seller shall notify the purchaser in writing of the method established by paragraph (b) of this order for determining adjusted maximum prices for resales of the article. This notice may be given in any convenient form.

(d) All requests not specifically granted by this order are hereby denied.

(e) This order may be revoked or amended by the Price Administrator at any time.

(f) This order shall become effective on the 17th day of October 1945.

Issued this 16th day of October 1945.

SHELBYVILLE DESK CO.

ADJUSTMENT OF MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith, and filed with the Division of the Federal Register, and pursuant to Second Revised Order No. A-3 under § 1499.159b of Maximum Price Regulation No. 188, it is ordered:

(a) *Manufacturer's maximum prices.* Shelbyville Desk Company of Shelbyville, Indiana, may sell and deliver the wood office furniture which it manufac-

tures at prices no higher than its maximum prices in effect immediately prior to the issuance of this order plus an adjustment charge of 6.4% of each such maximum price.

On all sales of these articles, the adjustment charge provided herein may be made and collected only if stated separately on each invoice.

The maximum prices of the manufacturer, as adjusted, are subject to its customary terms, discounts, allowances and other price differentials in effect during March, 1942 on sales to each class of purchaser.

(b) *Maximum prices of purchasers for resale.* A person who hereafter buys an article covered by this order and resells it in substantially the same form, may collect from his customer, in addition to his properly established maximum price in effect immediately before this order was issued, an adjustment charge in the same amount as the adjustment charge herein authorized and which he pays to his supplier. If he did not have a maximum price in effect for the article at the time this order was issued, he may add the same adjustment charge to the maximum price which he hereafter establishes for his sales under the applicable regulation. If the applicable regulation requires the maximum resale price to be computed on the basis of cost the reseller must find his maximum resale price (not including the permitted adjustment charge) by using as cost his invoice cost less any adjustment charge stated on the invoice as a separate amount.

On all sales this adjustment charge may be made and collected only if it is separately stated on each invoice. The adjusted price is subject to each seller's customary terms, discounts and allowances on sales of the same or similar articles.

(c) *Notification.* At the time of, or prior to, the first invoice to a purchaser for resale, showing a price adjusted in accordance with the terms of this order, the manufacturer shall notify the purchaser in writing of the method established in paragraph (b) of this order for determining adjusted maximum prices for resale of the articles covered by this order. This notice may be given in any convenient form.

(d) *Statements to be submitted to the Office of Price Administration.* After the effective date of this order Shelbyville Desk Company of Shelbyville, Indiana, shall submit to the Office of Price Administration, Washington, D. C., a detailed quarterly profit and loss statement, within thirty days after the close of each quarter.

(e) This order may be revoked or amended by the Price Administrator at any time.

(f) This order shall become effective on the 17th day of October 1945.

Issued this 16th day of October 1945.

[MPR 188, Order 6 Under Rev. Order 2525]

WINTER AND CO.

ADJUSTMENT OF MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to paragraph (d) (2) of Revised Order 2525 under § 1499.159b of Maximum Price Regulation No. 188, it is ordered:

(a) *Manufacturer's maximum prices for all sales except at retail.* Winter and Company, 849 East 141st Street, New York, New York, herein called the manufacturer, may use the following method to adjust its maximum prices, in effect prior to October 7, 1944, for all sales except sales at retail of new pianos of its manufacture.

(1) Subtract the Federal excise tax and any amount for freight which is included in the price to each class of purchaser.

(2) To this figure add 35.33% thereof.

(3) The result is the new maximum price to each class of purchaser. The Federal excise tax payable on that maximum price and any freight deducted may be added.

(b) *Maximum prices for sales at retail.* The maximum retail price for a sale or delivery by the manufacturer on or after August 17, 1945, or by a retailer (except a mail order house), of a piano which he receives on or after August 17, 1945 is the total of the following, adjusted upward or downward to the nearest dollar.

(1) The manufacturer's highest maximum price to retailers as established under paragraph (a) of this order (exclusive of freight and Federal excise tax).

(2) The applicable markup of the following: If the manufacturer's highest maximum price (exclusive of freight and Federal excise tax), is:

(i) Not more than \$225, add 69% of such maximum price.

(ii) Between \$225.01 and \$338.00, add 66% of such maximum price, or \$155.25, whichever is greater.

(iii) Between \$338.01 and \$564.00, add 61% of such maximum price, or \$223.03, whichever is greater.

(iv) Over \$564.00, add 58% of such maximum price, or \$344.04, whichever is greater.

(3) The amount of Federal excise tax payable by the manufacturer.

(4) The freight allowances indicated in paragraph (e) (2) (i) and (e) (2) (ii) (a) of Revised Order 2525 under Maximum Price Regulation No. 188.

The maximum retail prices as computed include the Federal excise tax and the permissible charge for freight. No additional amounts may be added thereto on account of these terms. Each seller at retail shall continue to furnish the services he customarily furnished in March 1942 on the sale of a new piano, as, for example, free delivery, tuning, etc. In addition, a seller at retail shall continue in effect, terms, discounts, trade-in and other allowances no less favorable to the purchaser than he allowed in March 1942. Local and state taxes and credit charges (in accordance with paragraph (i) of Revised Order

2525) may be added, together with other price differentials for which the seller at retail customarily made a separately stated charge during March 1942.

(c) *Applicability of provisions of Revised Order 2525.* The following paragraphs of Revised Order 2525 are specifically applicable to the pianos for which adjusted maximum prices are established by this order:

(e) Manufacturer's maximum prices for new or changed models.

(f) Tagging.

(h) Adjustment, correction, and revocation of maximum prices.

(i) Credit charges.

(j) Definitions.

(k) Relationship between this order, the General Maximum Price Regulation and Maximum Price Regulation No. 188.

(d) The revised maximum prices for sales by the manufacturer established by this order apply only to sales and deliveries made between August 17, 1945 and the ninetieth day after the effective date of the order. The revised maximum retail prices established by this order apply to all pianos shipped by the manufacturer from his manufacturing plant between August 17, 1945 and the ninetieth day following the effective date of this order.

This order shall become effective on the 17th day of October 1945.

Issued this 16th day of October 1945.

(b) The manufacturer and wholesalers shall grant, with respect to their sales of each brand and size or frontmark of domestic cigars for which maximum prices are established by this order, the discounts they customarily granted in March 1942 on their sales of domestic cigars of the same price class to purchasers of the same class, unless a change therein results in a lower price. Packing differentials charged by the manufacturer or a wholesaler in March 1942 on sales of domestic cigars of the same price class to purchasers of the same class may be charged on corresponding sales of each brand and size or frontmark of cigars priced by this order, but shall not be increased. Packing differentials allowed by the manufacturer or a wholesaler in March 1942 on sales of domestic cigars of the same price class to purchasers of the same class shall be allowed on corresponding sales of each brand and size or frontmark of cigars priced by this order and shall not be reduced. If a brand and size or front-

mark of domestic cigars for which maximum prices are established by this order is of a price class not sold by the manufacturer or the particular wholesaler in March 1942, he shall, with respect to his sales thereof, grant the discounts and may charge and shall allow the packing differentials customarily granted, charged or allowed (as the case may be) in March 1942 by his most closely competitive seller of the same class on sales of domestic cigars of the same March 1942 price class to purchasers of the same class.

(c) On or before the first delivery to any purchaser of each brand and size or frontmark of domestic cigars for which maximum prices are established by this order, the manufacturer and every other seller (except a retailer) shall notify the purchaser of the maximum list price and the maximum retail price established by this order for such brand and size or frontmark of domestic cigars. The notice shall conform to and be given in the manner prescribed by § 1358.113 of Maximum Price Regulation No. 260.

(d) Unless the context otherwise requires, appropriate provisions of Maximum Price Regulation No. 260, shall apply to sales for which maximum prices are established by this order.

(e) This order may be revoked or amended by the Price Administrator at any time.

This order shall become effective October 17, 1945.

Issued this 16th day of October 1945.

WILLIAM R. REICHARD

AUTHORIZATION OF MAXIMUM PRICES

For the reasons set forth in an opinion accompanying this order, and pursuant to § 1358.102 (b) of Maximum Price Regulation No. 260; *It is ordered*, That:

(a) William R. Reichard, 33 Boundary Avenue, Red Lion, Pa. (hereinafter called "manufacturer") and wholesalers and retailers may sell, offer to sell or deliver and any person may buy, offer to buy or receive each brand and size or frontmark, and packing of the following domestic cigars at the appropriate maximum list price and maximum retail price set forth below:

Brand	Size or frontmark	Packing	Maximum list price	Maximum retail price
Prestons Special.	Handmade.....	50	Per M \$56	Cents 7

(b) The manufacturer and wholesalers shall grant, with respect to their sales of each brand and size or frontmark of domestic cigars for which maximum prices are established by this order, the

discounts they customarily granted in March 1942 on their sales of domestic cigars of the same price class to purchasers of the same class, unless a change therein results in a lower price. Packing differentials charged by the manufacturer or a wholesaler in March 1942 on sales of domestic cigars of the same price class to purchasers of the same class may be charged on corresponding sales of each brand and size or frontmark of cigars priced by this order, but shall not be increased. Packing differentials allowed by the manufacturer or a wholesaler in March 1942 on sales of domestic cigars of the same price class to purchasers of the same class shall be allowed on corresponding sales of each brand and size or frontmark of cigars priced by this order and shall not be reduced. If a brand and size or frontmark of domestic cigars for which maximum prices are established by this order is of a price class not sold by the manufacturer or the particular wholesaler in March 1942, he shall, with respect to his sales thereof, grant the discounts and may charge and shall allow the packing differentials customarily granted, charged or allowed (as the case may be) in March 1942 by his most closely competitive seller of the same class on sales of domestic cigars of the same March 1942 price class to purchasers of the same class.

(c) On or before the first delivery to any purchaser of each brand and size or frontmark of domestic cigars for which maximum prices are established by this order, the manufacturer and every other seller (except a retailer) shall notify the purchaser of the maximum list price and the maximum retail price established by this order for such brand and size or frontmark of domestic cigars. The notice shall conform to and be given in the manner prescribed by § 1358.113 of Maximum Price Regulation No. 260.

(d) Unless the context otherwise requires, appropriate provisions of Maximum Price Regulation No. 260, shall apply to sales for which maximum prices are established by this order.

(e) This order may be revoked or amended by the Price Administrator at any time.

This order shall become effective October 17, 1945.

Issued this 16th day of October 1945.

[MPR 64, Rev. Order 188]

GENERAL WESCO STOVE CO.

APPROVAL OF MAXIMUM PRICES

Order No. 188 under Maximum Price Regulation No. 64 is revised and amended to read as follows:

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to sections 8 and 11 of Maximum Price Regulation No. 64; *It is ordered:*

(a) This revised order establishes maximum prices for sales of the Model 19 General and Model 77 Major radiant magazine coal heaters and the Model 20 General circulating magazine coal heater manufactured by the General Wesco Stove Company, 621 North Jefferson Street, Springfield, Missouri, as follows:

(1) For sales by the manufacturer to retail dealers the maximum prices are as follows:

Model:	Maximum price to retail dealers (each)
19 General.....	\$32.00
77 Major.....	23.75
20 General.....	59.95
20 General with side vent doors....	62.95

These prices are f. o. b. factory and are subject to a cash discount of two percent for payment within ten days. They are also subject to the manufacturer's customary terms, discounts, allowances, and other price differentials which are no less favorable than those in effect during the period January 15 to June 1, 1941.

(2) For sales in each zone by retail dealers to ultimate consumers the maximum prices are those set forth below:

Model	Maximum prices to ultimate consumers—			
	Zone 1	Zone 2	Zone 3	Zone 4
19 General.....	Each \$55.95	Each \$58.95	Each \$61.50	Each \$64.50
77 Major.....	41.50	43.25	45.25	46.95
20 General.....	104.95	109.25	113.50	118.25
20 General with side vent doors.....	110.25	114.50	118.75	123.50

These prices are subject to each seller's customary terms, discounts, allowances and other price differentials in effect on sales of similar articles.

(b) At the time of, or prior to, the first invoice to each purchaser for resale after the effective date of this order, the General Wesco Stove Company shall notify the purchaser of the maximum prices and conditions established by this order for resales by the purchaser. This notice may be given in any convenient form.

(c) The General Wesco Stove Company, before delivering any stove covered by this revised order after the effective date of this order shall attach securely to the front of each stove a tag or label which plainly states its maximum retail prices in each zone, together with a list of the states included in each zone. This tag or label may not be removed until after the stove has been sold to an ultimate consumer.

(d) For purposes of this order, Zones 1, 2, 3, and 4 comprise the following states:

Zone 1: Missouri, Arkansas, Kansas and Oklahoma.

Zone 2: Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, New Jersey, Maryland, Delaware, Virginia, West Virginia, Ohio, Kentucky, Indiana, Michigan, Wisconsin, Illinois, Iowa, Minnesota, North Dakota, South Dakota, Nebraska, Texas, Louisiana, North Carolina, South Carolina, Tennessee, Georgia, Alabama, Mississippi, Florida and the District of Columbia.

Zone 3: Montana, Wyoming, Utah, Colorado, and New Mexico.

Zone 4: Washington, Oregon, Idaho, California, Nevada, and Arizona.

(e) This revised order may be revoked or amended by the Price Administrator at any time.

(f) This revised order shall become effective on the 18th day of October 1945.

Issued this 17th day of October 1945.

R. R. SCHNARS COAL CO. ET AL

ESTABLISHMENT OF MAXIMUM PRICES AND PRICE CLASSIFICATIONS

For the reasons set forth in an accompanying opinion, and in accordance with § 1340.210 (a) (6) of Maximum Price Regulation No. 120, It is ordered:

Producers identified herein operate named mines assigned the mine index numbers, the price classifications and the maximum prices in cents per net ton, for the indicated uses and shipments as set forth herein. All are in District No. 1. The mine index numbers and the price classifications assigned are permanent but the maximum prices may be changed by an amendment issued after the effective date of this order. Where such an amendment is issued for the district in which the mines involved herein are located and where the amendment makes no particular reference to a mine or mines involved herein, the prices shall be the prices set forth in such amendment for the price classifications of the respective size groups. The location of each mine is given by county and state. The maximum prices stated to be for truck

shipment are in cents per net ton f. o. b. the mine or preparation plant and when stated to be for rail shipment or for railroad locomotive fuel are in cents per net ton f. o. b. rail shipping point. In cases where mines ship coals by river the prices for such shipments are those established for rail shipment and are in cents per net ton f. o. b. river shipping point. However, producer is subject to the provisions of § 1340.212 and all other provisions of Maximum Price Regulation No. 120.

rately stated on each invoice. The
maximum prices of the manufacturer, as
adjusted, are subject to his customary
terms, discounts, allowances and other
price differentials in effect during March,
1942 on sales to each class of purchaser.

(b) *Maximum prices of purchasers for
resale.* Any purchaser for resale who
handles the articles for which the manu-
facturer's maximum prices have been ad-
justed as provided in paragraph (a) in
the course of their distribution from the
manufacturer to the user, may add to his
properly established maximum price for
these articles in effect immediately prior
to the effective date of the order, the dol-
lar and cents amounts of the adjustment
charges which he is required to pay to his
supplier, provided the amount of such
adjustment charges are separately stated.

The maximum prices, as adjusted, of
a purchaser for resale are subject to the
seller's customary discounts, allowances
and other price differentials in effect dur-
ing March, 1942 on sales to each class of
purchaser.

(c) *Notification.* At the time of, or
prior to, the first invoice to a purchaser
for resale on and after the effective date
of this order, showing a price adjusted
in accordance with the terms of this
order, the seller shall notify the pur-
chaser in writing of the method estab-
lished by paragraph (b) of this order for
determining adjusted maximum prices
for resales of the articles. This notice
may be given in any convenient form.

(d) All requests for adjustments not
specifically granted by this order are
denied.

(e) This order may be revoked or
amended by the Price Administrator at
any time.

(f) This order shall become effective on
the 18th day of October 1945.

Issued this 17th day of October 1945.

(a) This order establishes maximum prices for sales and deliveries of certain articles manufactured by Laurel Manufacturing Company, 223-243 North Water Street, Milwaukee, Wis.

(1) For all sales and deliveries to the following classes of purchasers by the sellers indicated below, the maximum prices are those set forth below:

Article	Model No.	For sales by the manufacturer to—		For sales by any person to consumers
		Jobbers	Retailers	
China table lamp, decal decorated with gold trim, and shade.....	975-16	\$6.61	\$7.78	\$14.00
China table lamp, decal decorated with gold trim, and shade.....	775-16	6.35	7.47	13.45
China table lamp, decal decorated with gold trim, and shade.....	990-16	7.39	8.69	15.65
China table lamp, decal decorated with gold trim, and shade.....	290-16	8.46	9.95	17.90
China table lamp, decal decorated with gold trim, and shade.....	680-16	5.95	7.00	12.60
China table lamp, decal decorated with gold trim, and shade.....	876-16	6.37	7.50	13.50

These maximum prices are for the articles described in the manufacturer's application dated July 6, 1945.

(2) For sales by the manufacturer, the maximum prices apply to all sales and deliveries since Maximum Price Regulation No. 188 became applicable to those sales and deliveries. For sales to persons other than consumers they are f. o. b. factory, 2% 10 days, net 30. The maximum price to consumers is net, delivered.

(3) For sales by persons other than the manufacturer, the maximum prices apply to all sales and deliveries after the effective date of this order. Those prices are subject to each seller's customary terms and conditions of sale on sales of similar articles.

(4) If the manufacturer wishes to make sales and deliveries to any other class of purchaser or on other terms and conditions of sale, he must apply to the Office of Price Administration, Washington, D. C., under the fourth Pricing Method, § 1499.158, of Maximum Price Regulation 188, for the establishment of maximum prices for those sales, and no

sales or deliveries may be made until maximum prices have been authorized by the Office of Price Administration.

(b) The manufacturer shall attach a tag or label to every article for which a maximum price for sales to consumers is established by this order. That tag or label shall contain the following statement, with the proper model number and the ceiling price inserted in the blank spaces:

Model Number -----
OPA Retail Ceiling Price—\$-----
Do Not Detach

(c) At the time of, or prior to, the first invoice to each purchaser for resale, the manufacturer shall notify the purchaser in writing of the maximum prices and conditions established by this order for sales by the purchaser. This notice may be given in any convenient form.

(d) Jobbers' maximum prices for sales of the articles covered by this order shall be established under the provisions of section 4.5 of SR 14J.

(e) This order may be revoked or amended by the Price Administrator at any time.

(f) This order shall become effective on the 18th day of October 1945.

Issued this 17th day of October 1945.

CHESTER BOWLES,
Administrator.

(b) The manufacturer and wholesalers shall grant, with respect to their sales of each brand and size or frontmark of domestic cigars for which maximum prices are established by this order, the discounts they customarily granted in March 1942 on their sales of domestic cigars of the same price class to purchasers of the same class, unless a change

therein results in a lower price. Packing differentials charged by the manufacturer or a wholesaler in March 1942 on sales of domestic cigars of the same price class to purchasers of the same class may be charged on corresponding sales of each brand and size or frontmark of cigars priced by this order, but shall not be increased. Packing differentials allowed by the manufacturer or a wholesaler in March 1942 on sales of domestic cigars of the same price class to purchasers of the same class shall be allowed on corresponding sales of each brand and size or frontmark of cigars priced by this order and shall not be reduced. If a brand and size or frontmark of domestic cigars for which maximum prices are established by this order is of a price class not sold by the manufacturer or the particular wholesaler in March 1942, he shall, with respect to his sales thereof, grant the discounts and may charge and shall allow the packing differentials customarily granted, charged or allowed (as the case may be) in March 1942 by his most closely competitive seller of the same class on sales of domestic cigars of the same March 1942 price class to purchasers of the same class.

(c) On or before the first delivery to any purchaser of each brand and size or frontmark of domestic cigars for which maximum prices are established by this order, the manufacturer and every other seller (except a retailer) shall notify the purchaser of the maximum list price and the maximum retail price established by this order for such brand and size or frontmark of domestic cigars. The notice shall conform to and be given in the manner prescribed by § 1358.113 of Maximum Price Regulation No. 260.

(d) Unless the context otherwise requires, appropriate provisions of Maximum Price Regulation No. 260, shall apply to sales for which maximum prices are established by this order.

(e) This order may be revoked or amended by the Price Administrator at any time.

This order shall become effective October 18, 1945.

Issued this 17th day of October 1945.

CHESTER BOWLES,
Administrator.

SECURITIES AND EXCHANGE COMMISSION.

[File Nos. 54-132, 70-1149, 70-1150]

ENGINEERS PUBLIC SERVICE CO. ET AL.

NOTICE OF FILING OF PLAN AND DECLARATIONS TO EFFECTUATE RELATED TRANSACTIONS, ORDER CONSOLIDATING PROCEEDINGS, AND ORDER FOR HEARING ON CONSOLIDATED MATTERS

At a regular session of the Securities and Exchange Commission held at its

office in the City of Philadelphia, Pa., on the 15th day of October, 1945.

In the matter of Engineers Public Service Company, File No. 54-132; El Paso Electric Company, File No. 70-1149; Gulf States Utilities Company, File No. 70-1150.

The Commission having previously instituted proceedings pursuant to section 11 (b) (1) of the Public Utility Holding Company Act of 1935 (File No. 59-4) with respect to Engineers Public Service Company (Engineers), a registered holding company, and each of its subsidiaries, to determine what action is necessary in order that the Engineers holding company system shall so limit its operations as to comply with the standards of that section; and

The Commission having entered orders on July 23, 1941, December 29, 1941 and September 16, 1942, pursuant to section 11 (b) (1) of the act, directing Engineers to sever its relationship with certain of its subsidiary companies by disposing or causing the disposition of its direct and indirect ownership, control and holding of securities issued and properties owned, controlled or operated by certain of its subsidiary companies; a petition to review the Commission's order of September 16, 1942 having been filed with the United States Court of Appeals for the District of Columbia, which Court set aside the order of the Commission and remanded the case to the Commission for further proceedings in accordance with its opinion; and both the Commission and Engineers having applied to the Supreme Court of the United States for writs of certiorari which have been granted and before which court the review proceeding is now pending; and Engineers having partially complied with such orders of the Commission by disposing of certain investments ordered divested therein, but still retaining investments in four public utility subsidiaries, namely, El Paso Electric Company (El Paso), Gulf States Utilities Company (Gulf States), Virginia Electric and Power Company (Virginia) and The Western Public Service Company (Western):

Notice is hereby given that Engineers has filed an application for approval of a plan pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 for the divestment of its interests in El Paso and Gulf States; and that El Paso and Gulf States, for the purpose of facilitating the effectuation of such plan, have filed declarations pursuant to section 7 of said act regarding the reclassification of their respective shares of common stock. The plan consists of Parts I, II, and III and separate orders are requested on each of said parts. It is stated that it is not expected that any portion of this plan shall be consummated until after the decision of the Supreme Court in the review proceeding referred to above. The plan, as filed, does not contain any request for court enforcement.

All interested persons are referred to said documents which are on file in the offices of this Commission for a statement of the transactions therein proposed, which are summarized below:

Part I of the plan provides for the following transactions:

1. Engineers proposes to borrow \$3,000,000 from a bank, such loan to be evidenced by a two-year note, payable \$750,000 semiannually. The loan agreement is to contain a provision for the borrowing of additional amounts, if needed, which provision is to be availed of in the event Western is not sold before the effective date of Part I of the plan or for any other reason. The agreement is to provide further that Engineers shall not, until the bank note is fully paid, pay any dividends in cash on its common stock.

2. Engineers then proposes to mail warrants to its common stockholders, each of which warrants will evidence the right to acquire from Engineers one share of Gulf States common stock for each share of Engineers common stock at the rate of \$11.50 per share to be payable in cash or by exchanging whole shares of Engineers preferred stock at the rate of \$100 per share plus accrued dividends, with a cash payment for the difference between the exchange value of Engineers preferred stocks and Gulf States common stock: *Provided, however*, That Engineers may withhold the mailing of such warrants in the event that, in its opinion, market conditions are such as to render it inadvisable to proceed with the issuance of such warrants. The warrants must be exercised on or before a specified date (to be approximately ten days after the mailing of the warrants). Upon the mailing of such warrants, Part I of the plan is then to be deemed effective. All warrants will be registered in the names of the common stockholders and will be transferable on the books of Engineers. Such warrants will be issued and distributed without the surrender by the common stockholders of Engineers of their common stock. Furthermore, any holder of Engineers preferred stock who surrenders such stock in exchange for Gulf States common stock will be entitled to receive, in respect to such surrendered shares, the same amount, if any, which preferred stockholders depositing their stock under the provisions of the following paragraph herein receive, in addition to \$100 a share. To the extent warrants are not exercised, Engineers will sell the shares of Gulf States common stock represented thereby as promptly thereafter and in such manner as the Board of Directors of Engineers deems to be in the best interest of Engineers, subject to the obtaining of the requisite regulatory approvals.

3. Engineers will deposit an amount equal to \$100 per share plus accrued dividends for each share of Engineers preferred stock not surrendered in exchange for Gulf States common stock as provided in paragraph 2 above (which sum is to be realized from the bank loan, the exercise of the warrants and the remaining balance from treasury cash) in trust with a bank or trust company for the benefit of its preferred stockholders. Five days prior to such deposit notice will be given to the preferred stockholders and will state that upon surrender of the preferred stock certificates to a Transfer Agent, the preferred stockholders will be paid \$100 per share

plus accrued dividends; and from and after the date of such deposit, dividends on the preferred stock are to cease. Thereafter the only right remaining to the registered holder of a preferred stock certificate will be the right to receive an additional amount, if any, as is determined to be payable as provided in Part II below.

4. Engineers will distribute as a dividend in partial liquidation its portfolio holdings of common stock of El Paso pro rata to the common stockholders of Engineers on the basis of $\frac{1}{5}$ th of a share of El Paso common stock for each share of common stock of Engineers. No fractional shares of common stock will be issued or delivered, but in lieu thereof scrip will be issued and delivered. Such scrip will not be entitled to dividends, voting rights or any other stockholders' rights. When combined in lots aggregating one or more full shares of stock, scrip may, up to the date of sale of such shares of stock, be exchanged for such shares, together with any dividends which shall have been paid to stockholders of record on any date subsequent to the effective date of Part I of the plan. Engineers proposes to undertake to provide facilities whereby any holder of scrip certificates may dispose of such scrip, or acquire additional scrip so as to enable the holder to exchange such scrip for full shares of stock. All shares of stock reserved for issuance and delivery upon the exchange of scrip which shall not have been issued or delivered in connection with such exchange within two years after the effective date of Part I, shall, promptly after the expiration of such period, be sold by the Transfer Agent and the Transfer Agent shall, as soon as possible thereafter, distribute to the holders of scrip certificates not theretofore surrendered their proportionate part of the proceeds of sale, plus their proportionate part of any dividends which shall have been declared to holders of record as of a date prior to the date of sale.

5. In order to provide a reserve for the payment, if any, to which Engineers' preferred stockholders shall be held to be entitled in addition to \$100 per share and accrued dividends, Engineers will retain its interest in the Virginia common stock until a final determination is so made.

6. Epsco, Inc., a mutual service company for the Engineers holding company system, will cancel its service contracts with Engineers, Virginia, El Paso, and Gulf States.

The plan provides that the consummation of Part I of the plan is dependent upon the satisfaction of certain conditions, among others, as follows:

(a) The Commission, when requested by Engineers, shall have instituted a proceeding in a court of competent jurisdiction pursuant to section 11 (e) of the act and such court shall have entered a separate decree or order finding Part I of the plan to be fair and equitable and appropriate to effectuate the provisions of section 11 of the act and such court shall have taken action to enforce and carry out the terms and provisions of Part I of the plan;

(b) There shall have been obtained from the United States Treasury Department (unless Engineers, in its discretion, shall waive this condition) a closing agreement or ruling or closing agreements or rulings as to the tax consequences of the transactions necessary to carry out Part I of the plan and such agreements or rulings shall be satisfactory to counsel for Engineers; and

(c) Any corporate action in connection with Part I of the plan, which may be deemed necessary by counsel for Engineers shall have been carried out in a manner satisfactory to such counsel.

Part II of the plan requests that the Commission issue a separate order finding that it is fair and equitable that no amount in addition to \$100 per share and accrued dividends be paid the Engineers preferred stockholders. However, it is: *Provided That* if the Commission finds and orders that some additional amount shall be paid to the preferred stockholders of Engineers, then and in such event Part II of the plan becomes automatically amended so as to provide that Engineers shall pay its preferred stockholders such additional amount as the Commission shall have so specified; *Provided, however,* That Engineers reserves the right to petition for a review of any such order.

Part III provides that within one year after all liabilities of Engineers have been finally determined and liquidated, Engineers will be legally dissolved and liquidated, with the remaining common stock of Virginia and the other remaining assets of Engineers being distributed pro rata to the Engineers common stockholders, or Engineers will be merged with Virginia with the Engineers common stockholders receiving their pro rata interest in the merged company. The details of Part III are to be supplied at a later date by amendment to this Part of the plan.

The plan provides that the consummation of Part III of the plan is dependent upon the satisfaction of certain conditions, among others, as follows:

(a) There shall have been obtained from the United States Treasury Department (unless Engineers, in its discretion, shall waive this condition) a closing agreement or ruling or closing agreements or rulings as to the tax consequences of the transactions necessary to carry out Part III of the plan, and such agreements or rulings shall have been satisfactory to counsel for Engineers; and

(b) Any corporate action in connection with Part III of the plan which may be deemed necessary by counsel for Engineers shall have been carried out in a manner satisfactory to such counsel.

Engineers has requested the Commission to issue appropriate orders and findings in connection with the proposed transactions hereinabove described in Parts I and III of the plan to conform and contain the recitations and requirements of Supplement R and section 1808 (f) of the Internal Revenue Code, as amended.

In connection with the proposed reclassification of the common stocks of El Paso and Gulf States so as to enable

Engineers to effectuate properly the carrying out of paragraphs 2 and 4 of Part I of the plan above, El Paso and Gulf States have filed with the Commission separate declarations under section 7 of the Act requesting, in effect, that the Commission issue orders at the same time or prior to the time it issues orders under Part I of the plan so as to enable both companies to amend their respective charters prior to the consummation of Part I of the plan.

El Paso proposes in its filing (File No. 70-1149) to amend its charter in order to change its presently authorized 150,000 shares of no par value common stock which are presently outstanding and held by Engineers into 381,994 shares of no par value common stock.

Gulf States proposes in its filing (File No. 70-1150) to amend its charter in order to (1) decrease its presently authorized 300,000 shares of no par value common stock by eliminating therefrom 20,000 shares of no par value common stock not heretofore issued and not now outstanding, (2) change the authorized 280,000 shares of no par value common stock which are presently outstanding and held by Engineers into 1,909,968 shares of no par value common stock and (3) change the voting rights of the holders of 120,000 shares of preferred stock of Gulf States now issued and outstanding so that in lieu of one vote per share of preferred stock, each share of preferred stock shall be entitled to seven votes.

El Paso and Gulf States have also requested the Commission to issue appropriate orders and findings in connection with the proposed transactions described above to conform and contain the recitations and requirements of Supplement R and section 1808 (f) of the Internal Revenue Code, as amended.

It appearing to the Commission that the proceedings with respect to said plan and said declarations are related to and involve common questions of law and fact and therefore should be consolidated; and

It further appearing to the Commission that it is proper and in the public interest and in the interest of investors and consumers that a hearing be held with respect to said plan and said declarations, and that said plan should not be approved and that said declarations should not become effective, except pursuant to further order of the Commission; and

It further appearing appropriate in view of the Commission's order of September 16, 1942 and of the provisions of section 11 (d) with respect to court enforcement of such an order, to provide opportunity for hearing, as part of these consolidated proceedings, as to whether the Commission should approve any plan of reorganization of Engineers that may be hereafter proposed by the Commission in the first instance or by any person having a bona fide interest in the reorganization;

It is hereby ordered, That the proceedings on the plan (File No. 54-132) and the declarations (Files Nos. 70-1149 and 70-1150) be, and hereby are, consolidated.

It is further ordered, That a hearing be held at 10:00 a. m., e. s. t., on the 13th day of November, 1945, at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania, in such room as may be designated on such day by the hearing room clerk in Room 318. All persons desiring to be heard or otherwise wishing to participate in the proceedings should notify the Commission in the manner provided by its Rules of Practice, Rule XVII, on or before the 9th day of November, 1945.

It is further ordered, That Allen MacCullen or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said act and to a trial examiner under the Commission's rules of practice.

It is further ordered, That, without limiting the scope of the issues presented in the consolidated proceedings, particular attention will be directed at the hearing to the following matters and questions:

1. Whether the plan, as proposed or as modified, is necessary to effectuate the provisions of section 11 (b) of the act and is, in all respects, fair and equitable to the persons affected thereby.

2. Whether the proposed retirement of the \$5, \$5.50 and \$6 Preferred Stocks of Engineers at \$100 per share plus accrued dividends without payment of any amount in excess thereof is necessary to effectuate the provisions of section 11 (b) and fair and equitable to the persons affected thereby, and, if not, what payment for the retirement of such preferred stocks would be fair and equitable.

3. Whether the securities proposed to be issued by El Paso and Gulf States meet the requirements of section 7 of the act.

4. Whether the proposed issuance of a \$3,000,000 bank note and the proposed issuance of warrants by Engineers are necessary to effectuate compliance with section 11 (b) and conform with the standards of section 7.

5. Whether the plan should be modified to include a provision for the payment by Engineers of all fees and expenses by whomsoever incurred in connection with said plan or the proceedings with respect thereto which the Commission may determine, award, allow or allocate and whether the fees and expenses to be paid in connection with the consummation of the plan and all transactions incidental thereto are for necessary services and are reasonable in amount.

6. Whether the accounting entries in connection with the proposed transactions are in conformity with the standards of the Act and the Rules promulgated thereunder.

7. Whether, in the event the Commission shall approve such plan as filed or modified, the Commission shall approve such plan for purposes of section 11 (d) of the Act so as to permit the Commission on its own motion and irrespective of request therefor on the part of Engi-

neers, to apply to a court for enforcement of such plan pursuant to section 11 (d), or whether, in the event that the Commission shall not approve such plan as filed or as modified, a plan proposed by the Commission or by any person having a bona fide interest in the reorganization of Engineers should be approved by the Commission for purposes of section 11 (d), and, if proposed by the Commission, what the terms and provisions of such plan should be.

8. Whether, if the transactions proposed are authorized by the Commission, it is appropriate in the public interest and in the interest of investors and consumers that any terms and conditions be imposed in connection with such authorization and, if so, what such terms and conditions should be.

9. Generally, whether the proposed plan and all transactions incidental thereto are, in all respects, in the public interest and in the interest of investors and consumers and consistent with all applicable requirements of the act and the rules thereunder.

It is further ordered, that jurisdiction be reserved to separate, either for hearing, in whole or in part, or for disposition, in whole or in part, any of the issues, questions or matters herein set forth or which may arise in these proceedings or to consolidate with these proceedings other filings or matters pertaining to the subject matter of these proceedings, and to take such other action as may appear conducive to an orderly, prompt and economical disposition of the matters involved.

It is further ordered, That notice of this hearing be given to Engineers, El Paso and Gulf States and to all other interested persons, said notice to be given to Engineers, El Paso and Gulf States by registered mail and to all other interested persons by publication in the FEDERAL REGISTER.

It is further ordered, That Engineers give notice of this hearing to all its stockholders of record by mailing a communication giving the date, hour and place of hearing to each of said persons at his last known address at least 15 days prior to the date of the hearing and also advising that the company will, if requested, furnish copies of this notice and order for hearing to said persons.

By the Commission.

PENNSYLVANIA POWER & LIGHT CO. ET AL.
SUPPLEMENTAL ORDER RELEASING JURISDICTION AND PERMITTING APPLICATION AND DECLARATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa. on the 17th day of October, A. D., 1945.

In the matter of Pennsylvania Power & Light Company, National Power & Light

Company, and Electric Bond and Share Company, File No. 59-29; Pennsylvania Power & Light Company, National Power & Light Company, and Electric Bond and Share Company, File No. 54-128; Electric Bond and Share Company, National Power & Light Company, et al., File No. 59-12; Electric Bond and Share Company, National Power & Light Company, et al., File No. 54-51; Application 10.

The Commission having on September 26, 1945 issued its order herein under the applicable sections of the Public Utility Holding Company Act of 1935 approving and permitting to become effective an application and declaration, as amended, of Pennsylvania Power & Light Company, an electric and gas utility company and a subsidiary of National Power & Light Company, a registered holding company, which in turn is a subsidiary of Electric Bond and Share Company, also a registered holding company, with respect to the issue and public sale by Pennsylvania Power & Light Company of \$93,000,000 principal amount of First Mortgage Bonds ---% Series, due 1975 and \$27,000,000 principal amount of Sinking Fund Debentures, ---%, due 1965 in accordance with Rule U-50 (b) promulgated under said Act; and

The Commission in said order having reserved jurisdiction over the price to be paid for such bonds and debentures, their redemption prices, the interest rates thereon, the underwriters' spreads and their allocation, and all legal fees to be paid in connection with the proposed transactions; and

Pennsylvania Power & Light Company having filed an amendment to said application and declaration with respect to the bonds on October 3, 1945 setting forth the results of the competitive bidding thereon and stating that Pennsylvania Power & Light Company had accepted the bid of the group headed by Smith, Barney & Co. and the Commission having approved the price specified in such bid continuing its reservation of jurisdiction, however, over the price to be paid for the debentures, the redemption prices thereon, the interest rates thereon, and the underwriters' spread and its allocation, the bids on which were proposed to be opened on October 16, 1945; and

Pennsylvania Power & Light Company having filed a further amendment to said application and declaration stating that in accordance with the permission granted by said order of the Commission dated September 26, 1945, it offered said debentures for sale pursuant to the competitive bidding requirements of Rule U-50 and on October 16, 1945, received the following bids:

Bidder	Percent of principal amount ¹	Interest rate	Cost to company
Smith, Barney & Co.	100.7599	Percent 3	2.9494
The First Boston Corporation			
Dillon, Reed & Co., Inc.			
Halsey Stuart & Co., Inc.	101.4290	3 3/4	3.02915

¹ Exclusive of accrued interest.

Said amendment further stating that Pennsylvania Power & Light Company has accepted the bid of the group headed by Smith, Barney & Co. for the debentures as set out above and that the debentures will be offered for sale to the public at a price of 101.50%, resulting in an underwriters' spread of .7401; and

The Commission having examined said amendment and having considered the record herein, and finding no reasons for imposing terms or conditions with respect to the price to be paid for said debentures, the redemption prices therefor, the interest rate thereon and the underwriters' spread and its allocation:

It is ordered, That jurisdiction heretofore reserved over the price to be paid for said debentures, the redemption prices therefor, the interest rate thereon, and the underwriters' spread and its allocation be, and the same hereby is, released and that the said application and declaration as further amended, be, and the same hereby is, approved and permitted to become effective forthwith subject, however, to the terms and conditions prescribed in Rule U-24; and

It is further ordered, That jurisdiction heretofore reserved over all legal fees in connection with all of the transactions approved in our order of September 26, 1945 be, and the same hereby is, continued.

By the Commission.

UNION ELECTRIC CO. OF MISSOURI

ORDER PERMITTING AMENDED DECLARATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 16th day of October 1945.

Union Electric Company of Missouri, a registered holding company and a public utility subsidiary of The North American Company, also a registered holding company, having filed a declaration and amendments thereto pursuant to section 6 (a) and 7 of the Public Utility Holding Company Act of 1935 and Rule U-50 promulgated thereunder regarding the issuance and sale at competitive bidding of \$13,000,000 principal amount of First Mortgage and Collateral Trust Bonds, Series Due October 1, 1975, and 40,000 shares of preferred stock without par value; and

Union Electric Company, having agreed to a certain condition regarding a restriction upon the payment of common stock dividends; and

A public hearing having been held after appropriate notice upon said declaration, as amended, the Commission having considered the record and having made and filed its findings and opinion herein:

It is ordered, That the declaration, as amended, be and the same is hereby per-

mitted to become effective subject to the terms and conditions of Rule U-24 and to the following terms and conditions:

1. That the issue and sale of the bonds and preferred stock shall not be consummated until the results of the competitive bidding, pursuant to Rule U-50, have been supplied by amendment and a further order shall have been entered which order may contain such further terms and conditions as may then be deemed appropriate.

2. That so long as any shares of the presently outstanding Preferred Stock of the Company or of the new series of Preferred Stock of the Company remain outstanding, and until further order of the Commission upon application by the Company, the Company shall not pay any dividends on its common stock (other than dividends payable in common stock) or make any distribution on, or purchase or otherwise acquire for value, any of the shares of its common stock (each and all of such actions being hereinafter embraced in the term "payment of common stock dividends") except as follows:

(a) If and so long as the ratio of the capital represented by the common stock, including premiums on the capital stock, of the Company plus the consolidated surplus accounts of the Company and its subsidiary, Union Electric Power Company (hereinafter referred to as the "Subsidiary"), to the total capital of the Company and the consolidated surplus accounts of the Company and the Subsidiary at the end of the second calendar month immediately preceding the date of the proposed payment of common stock dividends adjusted to reflect the proposed payment of common stock dividends (which ratio is hereinafter referred to as the "capitalization ratio") is not less than 25%, the Company shall make no payment of common stock dividends which would reduce such capitalization ratio below 25% except to the extent permitted under paragraph (b) and (c) below;

(b) If and so long as such capitalization ratio is 20% or more but less than 25% then the payment of common stock dividends, including the proposed payment, during the twelve months period ending with and including the date of the proposed payment shall not exceed 75% of the consolidated net income of the Company and the Subsidiary applicable to the common stock of the Company during the twelve calendar months ending with and including the second calendar month immediately preceding the date of the proposed payment of common stock dividends; and

(c) If and so long as such capitalization ratio is less than 20% then the payment of common stock dividends, including the proposed payment, during the twelve months period ending with and including the date of the proposed payment shall not exceed 50% of the consolidated net income of the Company and the Subsidiary applicable to the common stock of the Company during the twelve calendar months ending with and including the second calendar month immediately preceding the date of the proposed payment of common stock dividends.

For the purpose of the foregoing provisions, the terms "Total capital of the Company", "Consolidated surplus accounts" and "Consolidated net income" shall have the meanings set forth in the registration statement filed by Union Electric Company of Missouri under the Securities Act of 1933, as amended.

It is further ordered, That the ten-day period for inviting bids as provided in Rule U-50 be and the same is hereby shortened to a period of not less than five days.

It is further ordered, That jurisdiction be and it is hereby reserved with respect to the legal fees and expenses to be paid to attorneys in connection with the proposed transactions.

By the Commission.

LONG ISLAND LIGHTING CO.

NOTICE REGARDING FILING

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 17th day of October 1945.

Notice is hereby given that an application or declaration (or both) has been filed with this Commission by Long Island Lighting Company ("Long Island"), a registered holding company, pursuant to the Public Utility Holding Company Act of 1935, particularly section 7 thereof. All interested persons are referred to the said application or declaration (or both) which is on file in the offices of the Commission for a statement of the transactions therein proposed, which may be summarized as follows:

Long Island will issue and sell, at a cash price of \$7,000,000, three 2% ten-year promissory notes, each to be dated December 27, 1945, and each to be payable in equal quarterly installments, in the aggregate principal amount of \$7,000,000, of which \$3,500,000 principal amount will be issued to The National City Bank of New York, \$2,000,000 principal amount to The New York Trust Company, and \$1,500,000 principal amount to The Public National Bank and Trust Company of New York. The proceeds of such notes, together with treasury cash will be utilized by Long Island to redeem, at the redemption price of 102¾% of principal amount, its outstanding 3¾% Sinking Fund Debentures due May 1, 1956, now outstanding in the principal amount of \$7,510,000.

Notice is further given that any interested person may, not later than October 25, 1945, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request and the nature of his interest, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 18th and Locust Streets, Phila-

delphia 3, Pennsylvania. At any time thereafter such declaration or application, as filed or as amended, may become effective or may be granted.

By the Commission.

[SEAL] ORVAL L. DuBOIS,
Secretary.

WAR PRODUCTION BOARD.

DOLAN STEEL CO.

[C-377, Revocation]

CONSENT ORDER

Pursuant to an agreement between the Dolan Steel Company, the Regional Compliance Manager and the Regional Attorney, Consent Order No. C-377 was issued June 27, 1945, in consequence of violations of Orders M-21-b-1 and M-21-b-3. The Dolan Steel Company has applied for revocation of the Consent Order with the approval of the Regional Compliance Manager and the Regional Attorney.

The parties to the agreement having now agreed that such order be revoked, it is hereby ordered that: *Consent Order No. C-377* be revoked.

Issued this 17th day of October 1945.

PARKERSBURG SENTINEL CO.

CONSENT ORDER

The Parkersburg Sentinel Company, a corporation, publisher of "The Parkersburg Sentinel", an evening paper except Sundays, and The Parkersburg Publishing Company, a corporation, publisher of "The Parkersburg News", a daily and Sunday paper, both located in Parkersburg, West Virginia, are substantially owned and controlled by the same persons and have been considered by the Printing and Publishing Division of the War Production Board as one publisher having been granted consumption quotas as one newspaper. Considering the consumption by both corporations of newsprint as a single operation they have been charged by the War Production Board with having violated Limitation Order L-240 during the third and fourth quarters of 1944, and the first quarter of 1945 by excess consumption of newsprint over the authorized quota in an aggregate amount of 168.848 tons. At a hearing of this matter, before a Compliance Commissioner, it was discovered that the actual amount of over-consumption was 158 tons. This amount has been reduced by a voluntary payback of 16 tons in the third quarter of 1945 leaving an over-consumption of 142 tons. The Parkersburg Sentinel Company and The Parkersburg Publishing Company claim that these violations were due to an oversight on the part of their manager, but do not desire further to question the violations as charged. Since the violations have been admitted with the explanation stated, and since the company does

not desire to contest the matter further before the Compliance Commissioner, an agreement has been reached by the company and the War Production Board and as hereinafter stated.

Wherefore, upon the agreement and consent of The Parkersburg Sentinel Company and The Parkersburg Publishing Company, the Regional Compliance Manager and the Regional Attorney, and upon the approval of the Compliance Commissioner, *It is hereby ordered, That:*

(a) The Parkersburg Sentinel Company and The Parkersburg Publishing Company shall reduce their consumption of print paper in the printing of the above named "Parkersburg Sentinel" and "Parkersburg News" by 43 tons per quarter under the consumption quota of print paper they would otherwise have been entitled to use under the provisions of Limitation Order L-240 for each quarter beginning with the fourth quarter of 1945 and ending with the second quarter of 1946, and by 13 tons for the third quarter of 1946 unless otherwise specifically authorized in writing by the War Production Board. The operations of the two corporations are intended to be covered, as in the past, as though they are one publisher.

(b) Nothing contained in this order shall be deemed to relieve The Parkersburg Sentinel Company and The Parkersburg Publishing Company from any restriction, prohibition, or provision contained in any other order or regulation of the War Production Board except insofar as the same may be inconsistent with the provisions hereof.

(c) The restrictions and prohibitions contained herein shall apply to The Parkersburg Sentinel Company and The Parkersburg Publishing Company, their successors and assigns, or persons acting on their behalf. Prohibitions against the taking of any action include the taking indirectly as well as directly of any such action.

Issued this 18th day of October 1945.
